Girls Who Ride Motorcycles:

Women Who Ride the Hoka Hey Abigail Van Vlerah, 2019-08-16 The Hoka Hey Motorcycle Challenge is an endurance ride that takes participants across the United States Riding 20 hours a day or more for 7-12 days straight they traverse back roads brave dangerous conditions and battle mental and physical exhaustion Fewer than 10 percent of participants are women They take on the challenge and they excel Chronicling the journeys of 14 women who participated in the Hoka Hey Lakota for Let's do it from 2010 to 2013 this feminist cultural analysis relates their often harrowing stories of life on the road and draws comparisons to women in other sports *The MotoLady's Book of Women Who Ride* Alicia Mariah Elfving, 2021-05-18 Written and curated by Alicia Mariah Elfving founder of TheMotoLady.com and the Women's Motorcycle Show and arguably the most notable advocate for women in the motorcycling hobby The MotoLady's Book of Women Who Ride subverts all the tired women and motorcycle tropes offering the true stories of the women past and present who ride and wrench as well as anyone proving every bit as indispensable to maintaining and growing a positive motorcycling culture Historically depictions of women in motorcycle culture tend to objectify from the outlaw motorcycle club biker babe to cheesecake photography to posturing celebrities with motorcycles as props The truth is much different From the early days of motorcycle culture more than 100 years ago women have played a central role in making the motorcycle a legitimate form of transportation recreation and motorsport Elfving presents more than 70 figures in the motorcycle world from the Americas to Europe and even the Middle East and South Asia stunt riders racers builders customizers organizers and more Elfving links today's women motorcyclists with those of the past and illustrates the freedom represented by two wheels and how motorcycles allow women to transcend cultural expectations confidently You'll meet riders such as Sofi Tsingos who raises money for charities by building and auctioning motorcycles Safety ambassador Brittany Morrow who found her calling after surviving a high speed crash with no gear The Van Buren sisters who in 1916 were among the first motorcyclists to ride coast to coast and the first women to ride to the summit of Pikes Peak The late Jessi Combs an iconic TV personality metal fabricator and land speed record holder Overwhelmingly positive Elfving instills confidence and can do rather than providing an echo chamber of common complaints among women in motorcycling In addition The MotoLady's Book of Women Who Ride is illustrated throughout with contemporary and historical photos of the author's subjects comprising a beautiful as well as inspiring package *The Women's Guide to Motorcycling* Lynda Lahman, 2016-06-28 Recent statistics show that approximately 12 percent of motorcycle owners are women and that close to 25 percent of motorcycle riders are women While it's still a male dominated field the number of female bikers has increased by more than 25 percent in just five years showing that women have a strong presence on two wheels In The Women's Guide to Motorcycling author Lynda Lahman herself a motorcycle owner and rider provides a comprehensive look at motorcycling techniques street smarts and safety concerns while addressing female specific challenges as well as issues that all bikers face from a female point of view INSIDE

An Alternative History of Bicycles and Motorcycles Steven E. Alford, Suzanne Ferriss, 2016-04-06 An Alternative History of Bicycles and Motorcycles Two Wheeled Transportation and Material Culture accounts for the nineteenth century creation and development of two wheeled vehicles both human powered and motorized Specifically the book focuses on the period from 1885 which saw the appearance simultaneously of the Safety bicycle and the Einspur the first motorcycle to 1920 while exploring implications for later bicycling and motorcycling We argue that invention of these vehicles rather than the product of gifted individuals should be seen as the consequence of a number of historical economic cultural and political forces that intersect so unpredictably that the notion of a genius inventor is reductive The common evolutionary model of development from the bicycle to the motorcycle oversimplifies both the technology and its origins Stripping the vehicles of all their material and cultural associations such a model fails to advance our understanding of the devices their creators and their riders Taking a contemporary vehicle and tracing its lineage creates a false sense of evolutionary necessity in its creation and fails to account for the many possible developmental paths that were for whatever reason abandoned By contrast our book adopts a material culture approach a form of inquiry that stresses the connections between artifacts and social relations We consider not simply the bicycle and motorcycle as material objects but focus also on the complex socio political and economic convergences that produced the materials materials that in turn themselves shaped the vehicles appearance function and adoption by riders
