Hidden Criticism of the Angry Tyrant in Early Judaism and the Acts of the Apostles , Drew J. Strait, 2019-07-31
Hidden Criticism of the Angry Tyrant in Early Judaism and the Acts of the Apostles adds to the current literature of imperial critical New Testament readings with an examination of Luke's hidden criticism of imperial Rome in the Acts of the Apostles and in Paul's speech on the Areopagus in Acts 17. Focusing on discursive resistance in the Hellenistic world, Drew J. Strait examines the relationship between hidden criticism and persuasion and between subordinates and the powerful and he explores the challenge to the dissident voice to communicate criticism while under surveillance. Strait argues that Luke confronts the idolatrous power and iconic spectacle of gods and kings with the Gospel of the Lord of all, a worldview that is incompatible with the religions of Rome, including emperor worship.

Embodiments of Will Michael Frampton, 2008 This book examines the two chief anatomical and physiological embodiment theories of voluntary animal motion which I call the cardiosinew and cerebroneuromuscular theories of motion from the time of Aristotle 384-322 B.C. to that of Mondino d'A.D. 1326 The study of animal motion commenced with the ancient Greek natural scientist Aristotle who wrote the monograph On the motion of animals *De motu animalium* Subsequent inquiries into voluntary animal motion may be found in a variety of Greek Latin and Arabic compendia commentaries and encyclopedias throughout the ancient and medieval periods The motion of animals was considered relevant to natural philosophers and theologians investigating the nature of the soul and to physicians seeking to discover the causes of disorders of voluntary movement such as epilepsy and tetany The book fills a gap in the scholarly literature concerned with pre-modern studies of the anatomical and physiological mechanisms of will and bodily movement The accompanying photographs of my own anatomical dissections illuminate ancient and medieval conceptual empirical and experimental methods of anatomical and physiological research *Classics in Progress* T.
