

Document-Based Questions – World History**Document 1****Random Facts About the World!**

By most standards there are a maximum of seven continents: Africa, Antarctica, Asia, Australia, Europe, North America, and South America. Some geographers now refer to six continents because they consider Europe and Asia combined creating one solid landmass. However, scientifically there are still seven continents on the world today. There are 20 kingdoms around the world today. There are 194 countries in the world today. 190 of these countries are part of the United Nations, which was created after World War II to keep peace throughout the world. The world's newest country is South Sudan, which gained independence from Sudan on July 9, 2011. There are 61 colonies or territories in the world. Eight countries maintain these: Australia, Denmark, Netherlands, France, New Zealand, Norway, the United Kingdom, and the United States. There are current areas that used to have different names (now they do today). For example, Mesopotamia, the fertile plain between the Tigris and Euphrates Rivers, is now Iraq (as well as smaller parts of Syria, Turkey, and Iran). The kingdom of Persia is now Iran. Also, Zaïre, the name of one of the largest countries in Africa, was changed in 1967 to the Democratic Republic of Congo.

1. How many continents are there by most standards? _____
2. What are the names of the continents? _____
3. How many kingdoms are there in the world today? _____
4. How many countries are in the world today? _____
5. How many countries are part of the United Nations? _____
