Rummel: An Assessment of His Many Contributions** Nils Petter Gleditsch, 2017-05-30 This book is open access under a CC BY license The book

provides a critical and constructive assessment of the many contributions to social science and politics made by Professor R.J. Rummel. Rummel was a prolific writer and an important teacher and mentor to a number of people who in turn have made their mark on the profession. His work has always been controversial. But after the end of the Cold War, his views on genocide and the democratic peace in particular have gained wide recognition in the profession. He was also a pioneer in the use of statistical methods in international relations. His work is not easily classified in the traditional categories of international relations research: realism, idealism, and constructivism. He was by no means a pacifist, and his views on the US-Soviet arms race led him to be classified as a hawk. But his work on the democratic peace has become extremely influential among liberal IR scholars and peace researchers. Above all, he was a libertarian.

Global Entanglements of a Man Who Never Traveled  
Dominic Sachsenmaier, 2018-05-29  
Born into a low-level literati family in the port city of Ningbo, the seventeenth-century Chinese Christian convert Zhu Zongyuan likely never left his home province. Yet Zhu nonetheless led a remarkably globally connected life. His relations with the outside world, ranging from scholarly activities to involvement with globalizing Catholicism, put him in contact with a complex and contradictory set of foreign and domestic forces. In *Global Entanglements of a Man Who Never Traveled*, Dominic Sachsenmaier explores the mid-seventeenth-century world and the worldwide flows of ideas through the lens of Zhu's life, combining the local, regional, and global. Taking particular aspects of Zhu's multiple belongings as a starting point, Sachsenmaier analyzes the contexts that framed his world as he balanced a local life and his border-crossing faith. At the local level, the book pays attention to the intellectual, political, and social environments of late Ming and early Qing society, including Confucian learning and the Manchu conquest, questioning the role of ethnic and religious identities. At the global level, it considers how individuals like Zhu were situated within the history of organizations and power structures such as the Catholic Church and early modern empires amid larger transformations and encounters. A strikingly original work, this book is a major contribution to East Asian transnational and global history with important implications for historical approaches and methodologies.

**Research Handbook on Mediating International Crises**

Jonathan Wilkenfeld, Kyle Beardsley, David Quinn, 2019  
Current conceptions of mediation can often fail to capture the complexity and intricacy of modern conflicts. This *Research Handbook* addresses this problem by presenting the leading expert opinions on international mediation, examining how international mediation practices, mechanisms, and institutions should adapt to the changing characteristics of contemporary international crises.

**A Theory of Foreign Policy**  
Glenn Palmer, T. Clifton Morgan, 2011-10-30  
This book presents a general explanation of how states develop their foreign policy. The theory stands in contrast to most approaches which assume that states want to maximize security by assuming that states pursue two things or goods through their foreign policy: change and maintenance. States, in other words, try both to change aspects of the international status quo that they don't like and maintain those aspects they do like. A state's ability to do so is largely a function of its relative capability, and since national capability is finite, a state must make trade-offs between policies.

designed to achieve change or maintenance Glenn Palmer and Clifton Morgan apply their theory to cases ranging from American foreign policy since World War II to Chinese foreign policy since 1949 to the Suez Canal Crisis The many implications bear upon specific policies such as conflict initiation foreign aid allocation military spending and alliance formation Particularly useful are the implications for foreign policy substitutability The authors also undertake statistical analyses of a wide range of behaviors and these generally support the theory A Theory of Foreign Policy represents a major advance over traditional analyses of international relations Not only do its empirical implications speak to a broader range of policies but more importantly the book illuminates the trade offs decision makers face in selecting among policies to maximize utility given a state's goals

*Arguing about Alliances* Paul Poast, 2019-11-15 Why do some attempts to conclude alliance treaties end in failure From the inability of European powers to form an alliance that would stop Hitler in the 1930s to the present inability of Ukraine to join NATO states frequently attempt but fail to form alliance treaties In *Arguing about Alliances* Paul Poast sheds new light on the purpose of alliance treaties by recognizing that such treaties come from negotiations and that negotiations can end in failure In a book that bridges Stephen Walt's *Origins of Alliance* and Glenn Snyder's *Alliance Politics* two classic works on alliances Poast identifies two conditions that result in non agreement major incompatibilities in the internal war plans of the participants and attractive alternatives to a negotiated agreement for various parties to the negotiations As a result *Arguing about Alliances* focuses on a group of states largely ignored by scholars states that have attempted to form alliance treaties but failed Poast suggests that to explain the outcomes of negotiations specifically how they can end without agreement we must pay particular attention to the wartime planning and coordinating functions of alliance treaties Through his exploration of the outcomes of negotiations from European alliance negotiations between 1815 and 1945 Poast offers a typology of alliance treaty negotiations and establishes what conditions are most likely to stymie the attempt to formalize recognition of common national interests
