Global Land Grabs History Theory And Method Thirdworlds:

Global Land Grabs Marc Edelman, Carlos Oya, Saturnino M. Borras Jr., 2016-03-22 Since the 2008 world food crisis a surge of land grabbing swept Africa Asia and Latin America and even some regions of Europe and North America Investors have uprooted rural communities for massive agricultural biofuels mining industrial and urbanisation projects Water grabbing and green grabbing have further exacerbated social tensions Early analyses of land grabbing focused on foreign actors the biofuels boom and Africa and pointed to catastrophic consequences for the rural poor Subsequently scholars carried out local case studies in diverse world regions The contributors to this volume advance the discussion to a new stage critically scrutinizing alarmist claims of the first wave of research probing the historical antecedents of today s land grabbing examining large scale land acquisitions in light of international human rights and investment law and considering anew longstanding questions in agrarian political economy about forms of dispossession and accumulation and grassroots resistance Readers of this collection will learn about the impacts of land and water grabbing the relevance of key theorists including Marx Polanyi and Harvey the realities of China s involvement in Africa how contemporary land grabbing differs from earlier plantation agriculture and how social movements and rural people in general are responding to this new threat This book was published as a special issue of Third World Quarterly Global Land Grabs Marc Edelman, Carlos Oya, Saturnino M. Borras Jr., Saturnino M. Borras, 2016-06-08 The essays in Global Land Grabs take the debate over land grabbing to a new stage scrutinizing claims of earlier research probing historical antecedents of today s land grabbing examining large scale land acquisitions in light of international human rights and investment law and considering anew longstanding questions in agrarian political economy about forms of dispossession and accumulation and grassroots resistance This book was published as a special issue of Third World Quarterly **The Green Economy in the Global South** Stefano Ponte, Daniel Brockington, 2018-10-11 The idea and practice of the green economy is gaining momentum coinciding with financial instability and continued economic woe in the Global North but generally more positive economic circumstances in the Global South Green economic initiatives in the Global South are multiplying and include carbon payments ecotourism community based wildlife management sustainability certification initiatives and offsets by mining companies exploiting new resources These initiatives are reallocating resources redefining inequalities and redistributing the fortune and misfortune of participants of the green economy and those excluded from it They have also led to resistance locally nationally and transnationally and to demands for alternatives to market driven instruments and solutions which are generally gaining strength and coherence The articles included in this volume bring together a multi disciplinary team of scholars from North and South to provide nuanced analyses of green economy experiences in the Global South analysing the opportunities they provide but also the redistributions they entail and the kinds of resistances they face The ultimate aim of the collection is to provide a critical but balanced overview of the emerging green economy in the Global South and point the

way to possible adjustments alternatives or radical resistance depending on different situations This book was originally published as a special issue of Third World Quarterly

Grabbing Back Alexander Reid Ross, 2014-06-09 Land grabs are a global phenomenon of our times driven by the ever increasing demands of both global corporations and the governments with which they are allied But as this powerful and timely book demonstrates ordinary citizens small farmers and ordinary citizens around the world are standing up to defend their own with passion and ingenuity and they are recording successes that are both extraordinary and inspiring Oliver Tickell Editor The Ecologist Climate change ravages the earth while wealthy elites try to grab as much of the world's diminishing resources as possible As Vandana Shiva writes land is life But land and the struggle to possess it is also power colonial and corporate power to be sure but also the power of the dispossessed to rise up and call for an end to the global land grab Grabbing Back maps this struggle bringing together analyses that uncover the politics of cultivation and control In this unprecedented collection on the ground activists join forces with critically acclaimed scholars to document the commodification and consumption of space from foreclosed homes to annihilated rainforests from ecotourism in Sri Lanka to the tar sands of Montana and to outline the strategies and tactics that might the destruction With contributions by Vandana Shiva Noam Chomsky Max Rameau Grace Lee Boggs Michael Hardt Ahjamu Umi Ben Dangl and many others More Praise for Grabbing Back Part of the reason that knowledge about the current global land grab is so uncertain is the paucity of perspectives and analysis in defining the problem This book fills the gap admirably Raj Patel author of Stuffed and Starved The acquisition control and exploitation of land as well as the simultaneous dispossession of land based and peasant communities is central to the processes of both colonialism and capitalism As Fanon reminds us egalitarian governance and stewardship of land is fundamental to the struggle for liberation and self determination for all oppressed peoples This makes Grabbing Back a necessary study for anticapitalist and anticolonial movements Harsha Walia author of Undoing Border Imperialism Grab back this sparkling mosaic of essays as a treasure of our new old knowledge commons Together these pieces replace dichotomies with dialectics making explicit the inseparability of land and collective life Together they restore the vital concept of social ecology in resistance to relentless and increasingly apocalyptic capitalism with emphasis on its second contradiction its impossibility on a finite resource base Maia Ramnath author of Decolonizing Anarchism As the forces of thanatos leave no stone unturned in their quest to dominate the entire planet this anthology provides a much needed antidote Weaving together accounts from around the world the authors advocate building grassroots movements aimed at subverting capital's incessant assault on our lives and land George Katsiaficas author of Asia's Unknown Uprisings Never perhaps has the land question been so crucial for anti capitalist movements as we are witnessing a global process of enclosure that privatizes lands waters forests displacing millions from their homes and placing monetary gates to what we rightly considered our commonwealth It is essential then that we understand what motivates this drive and its effects in all their social and spatial dimensions Grabbing Back takes us through this process identifying the reasons and

actors behind this global land grab and most important introducing us to the struggles that people are making across the world to resist being evicted from their lands and to reclaim the earth George Caffentzis Committee for Academic Freedom in Africa **Global Land Grabbing and Political Reactions "from Below"** Marc Edelman,2015 [The Global Land Grab](#),2013 **The Global Land Grab** Maria Margaretha Antonia Kaag,E. B. Zoomers,2014 The last two years have seen a huge amount of academic policy making and media interest in the increasingly contentious issue of land grabbing the large scale acquisition of land in the Global South It is a phenomenon against which locals seem defenceless and one about which multilateral organizations such as the World Bank as well as civil society organizations and action NGOs have become increasingly vocal This in depth and empirically diverse volume taking in case studies from across Africa Asia and Latin America takes a step back from the hype to explore a number of key questions does the global land grab actually exist If so what is new about it And what beyond the immediately visible dynamics and practices are the real problems The Global Land Grab is a comprehensive and much needed intervention on one of the most hotly contested but little understood issues facing Global South countries today
