various ancient and modern Bible translations into Syriac Coptic Ethiopian Armenian among other languages The second part discusses how unlike in the Protestant and Roman Catholic faiths where the canon of the Bible is closed and limited to 39 and 46 books respectively the Orthodox canon is open ended consisting of 39 canonical books and 10 or more anaginoskomena or readable books as additions to Septuagint The third part shows how unlike the classical Protestant view of sola scriptura and the Roman Catholic way of placing Scripture and Tradition on par as sources or means of divine revelation the Orthodox view accords a central role to Scripture within Tradition with the latter conceived not as a deposit of faith but rather as the Church's life through history The final two parts survey traditional Orthodox hermeneutics consisting mainly of patristic commentaries and liturgical interpretations found in hymnography and iconography and the ways by which Orthodox biblical scholars balance these traditional hermeneutics with modern historical critical approaches to the Bible
