**German Literature of the Early Middle Ages** Brian Murdoch, 2004 A detailed contextualized picture of the very beginnings of writing in German from around 750 to 1100 This second volume of the set not only presents a detailed picture of the beginnings of writing in German from its first emergence as a literary language from around 750 to 1100 but also places those earliest writings into a context The first stages of German literature existed within a manuscript culture so careful consideration is given to what constitutes the actual texts but German literature also arose within a society that had recently been Christianized through the medium of Latin Therefore what we understand by literature in Germany at this early period must include a great amount of writing in Latin Thus the volume looks in detail at Latin works in prose and verse but with an eye upon the interaction between Latin and German writings Some of the material in the newly written German language is not literary in the modern sense of the word but makes clear the difficulties and indeed the triumphs of the establishing of a written literary language Individual chapters look first at the earliest translations and functional literature in German including charms and prayers next the examination of heroic material juxtaposes the Hildebrandlied with the Christian Ludwigslied and with Latin writings like Waltharius and the panegyrics Otfrid's work the Gospel poem in German is given its due prominence the smaller German texts and the later prose works are fully treated as is chronicle writing in German and Latin Old High German literature was a trickle compared to the flood of the Latin that surrounded and influenced it but its importance is undeniable that trickle became a river Contributors Linda Archibald Graeme Dunphy Stephen Penn Christopher Wells Jonathan West Brian Murdoch Brian Murdoch is Professor of German at the University of Stirling Scotland **Medieval and Renaissance Scholarship** Mann, Munk Olsen, 2021-11-29 This volume contains the expanded papers of the second workshop of the European Science Foundation Network on the Classical Tradition in the Middle Ages and the Renaissance devoted to classical scholarship in the Middle Ages and the Early Renaissance It focuses on commentaries on Horace Lucan Statius and Terence Byzantine grammatical commentaries accessus ad auctores Old High German glosses and pseudo antique literature A comprehensive bibliography containing some thousand items makes this an essential tool for anyone concerned with the diverse aspects of mediaeval and renaissance scholarship in particular in relation to classical Greek and Latin texts textual criticism commentaries and glosses and questions of attribution

matlab nlms algorithm is not converging multiple - Jan 28 2022

web sep 2 2015 the normalized least mean square algorithm is used in digital filtering it basically tries to imitate an unknown filter so their difference which is considered the error tends to zero the factor of convergence is that the error will start very high and with the continuous run of the algorithm it will be smaller

*an overview on optimized nlms algorithms for acoustic echo* - Nov 06 2022

web nov 19 2015 the jo nlms algorithm requires the estimation of three main parameters i e  $\sigma_x^2$   $\sigma_v^2$  and  $\sigma_w^2$  the first one can be easily evaluated as in the nlms algorithm i e  $\widehat{\sigma_x^2} = \frac{1}{L} \sum_{n=1}^L \mathbf{x}^T(n) \mathbf{x}(n)$
