*The Underdog Anthology, Volume 1* HK Hillman, 2016-12-09 32 stories by nine authors across a wide range of genres most of which are certainly not suitable for children Sex violence blood gore booze drugs cowboys and smoking this book has it all The first anthology of Underdogs contains something for everyone and a few things that are probably for nobody It's a lucky dip If you're feeling lucky *Aces High, Volume 1* Christopher Shores, Clive Williams, 2008-09-18 First in the Aces High series a military reference of the fighter pilots who had five or more confirmed victories while serving in the Royal Air Force Introduced by the French quite early in World War I the term ace was used to describe a pilot credited with five or more aerial victories But in the United Kingdom the term was never officially recognized Becoming an ace was partly luck especially considering the campaigns in which they flew and the areas of combat There are three distinct kinds of aces the defensive ace the offensive ace and the night fighter This book is a revised collection of the biographies of the highest scoring Allied fighter pilots of World War II including those with the confirmed claims of shooting down five aircraft and those pilots with lower scores but whose wartime careers prove them worthy of inclusion All details of their combat are arranged in tabular form Included are a selection of photographs from hitherto private collections There are some authors whose name alone is sufficient reason to buy a book and Christopher Shores is surely one of these By profession a chartered surveyor he served in the Royal Air Force in the 1950s so his writing bears the stamp of authenticity HistoryNet

*Operation Barbarossa: the Complete Organisational and Statistical Analysis, and Military Simulation Volume IIB* Nigel Askey, 2014-08-26 Volume IIB is the second volume relating to and completing the Wehrmacht and the German mobilisation and war economy from June to December 1941 It includes the most detailed Orders of Battle ever published on the German Heer Luftwaffe Waffen SS and Kriegsmarine in all areas of the Reich between 22nd June and 4th July 1941 Even small and obscure units are included such as flak companies artillery HQs observation battalions bridging columns Landesschützen battalions MP battalions railroad companies and Luftwaffe Kurierstaffeln Verbindungsstaffeln and Sanitätsflugbereitschaften The Luftwaffe OOBs also include details on aircraft types and strengths in each air unit *Airplane Stories and Histories* Norman Currey, 2017-03-24 *Airplane Stories and Histories* chronicles two hundred years of aviation highlights including the exploits of pioneers such as Sir George Cayley the Wright brothers Charles Lindbergh Wiley Post Amelia Earheart R J Mitchell Sir Geoffrey de Havilland Allard Loughead Frank Whittle and Kelly Johnson Notable events and developments are discussed such as the first flight first transatlantic flight first around the world flight the jet engine Spitfire Mustang Mosquito Comet Concorde Boeing 747 C 5 Galaxy Avro Arrow C 130 Hercules and the advent of unmanned vehicles drones An extensive bibliography is provided for those who wish to explore subjects at greater depth *Ireland Army, National Security and Defense Policy Handbook Volume 1 Strategic Information and Developments* IBP USA, 2013-08 2011 Updated Reprint Updated Annually Ireland Army National Security and Defense Policy Handbook *The Journal of the Royal*

*Aeronautical Society*, 1959      Unflinching Zeal Robin Higham, 2012-09-15 This consequential work by a pioneer aviation historian fills a significant lacuna in the story of the defeat of France in May June 1940 and more fully explains the Battle of Britain of July October of that year and the influence it had on the Luftwaffe in the 1941 invasion of the USSR Robin Higham approaches the subject by sketching the story and status of the three air forces the Armée de l'Air the Luftwaffe and the Royal Air Force their organization and preparation for their battles He then dissects the campaigns their losses and replacement policies and abilities He paints the struggles of France and Britain from both the background provided by his recent *Two Roads to War From Versailles to Dunkirk* NIP 2012 and from the details of losses tabulated by *After the Battle s The Battle of Britain* 1982 2nd ed and Peter Cornwell's *The Battle of France Then and Now* 2007 as well as in Paul Martin's *Invisible Vainqueurs* 1990 and from the Luftwaffe summaries in the British National Archives Cabinet papers One important finding is that the consumption and wastage was not nearly as high as claimed The three air forces actually shot down only 19 percent of the number claimed In the RAF case in the summer of 1940 44 percent of those shot down were readily repairable thanks to the salvage and repair organizations This contrasted with the much lower 8 percent for the Germans and zero for the French Brave as the aircrews may have been the inescapable conclusion is that awareness of consumption wastage and sustainability were intimately connected to survival      Enemy at the Gates Justo Miranda, 2019-12-08 When the Nazis started to threaten the world with their efficient machine of propaganda the main concern of European governments was the overwhelming reaction of panic that the expected bombing of the Luftwaffe might cause within the civil population During the Munich Agreement in 1938 the democracies were defended by old biplanes and a bunch of modern fighters 50 Hurricanes 20 Morane 405 and 5 Fokker D XXI France and Great Britain took up the production of USA airplanes and cancelled exports to small countries which were forced to design and build their own PANIC FIGHTERS with the intelligence and skill that desperation provides When nothing seemed able to contain the German advance France Great Britain and the USSR developed several programs of emergency fighters as did Australia to face the Japanese expansion At the time the course of events switched it was the Axis powers that had to create their own PANIC FIGHTERS some of them suicidal The present book includes several last resource designs of fighters that are practically unknown and that were developed in times of tribulation by Australia Belgium Bulgaria Canada Czechoslovakia Denmark Estonia Finland France Germany Great Britain Hungary Japan Yugoslavia Latvia Netherland Poland Romania Sweden and Switzerland      **Collision of Empires** A. D. Harvey, 1993-07-01 The only previous war to match the world wars of the twentieth century in scale and impact was the French War of 1793 1815 This book is the first book to compare these conflicts which together shaped the history of the modern world A D Harvey relates the causes conduct and outcome of these wars to the fundamental nature of the societies which fought them Political decisions economic power and social attitudes interfaced with the demands of military technology to determine the outcome of each case Britain is the centre of focus but is seen against a background of the other

combatants Harvey's ability to make large scale generalisations is backed up by a wealth of fascinating and carefully documented detail making this outstanding and exceptionally well written book a pleasure to read The author has tackled a huge subject and has not been afraid to face up to either its complexities or its implications By asking new questions and using a range of unfamiliar sources this book provides an unusually profound analysis not only of these wars but also of the nature of modern society and of our understanding of the past *The Battle for Norway: April-June 1940* Geirr

Haarr,2010-05-10 The acclaimed historian and author of *The Gathering Storm* continues his in depth study of Northern European naval warfare during WWII The Nazi invasion of Norway in 1940 was the first modern campaign in which sea air and ground forces interacted decisively In this detailed history Gierr H Haarr presents a comprehensive study of the naval aspects of the operation He begins with the events off the coast of southern and western Norway where Norwegian and British forces attempted to halt the German advance out of the invasion ports as well as the stream of supplies and reinforcements across the Skagerrak Strait Haarr then focuses on the British landings in Central Norway where the Royal Navy first had its mastery challenged by air superiority from land based aircraft Next he examines the events in and around Narvik where Allied naval air and land forces were engaged in the first combined amphibious landings of World War II Finally Haarr sums up the the evacuation in June in which the first carrier task force operations of the war including the loss of the HMS *Glorious* figure prominently As Haarr's previous volume *The Gathering Storm* the narration shifts between strategic and operational issues and the experiences of the officers and soldiers on the frontlines Extensive research and use of primary sources reveal the many sides of this battle some of which remain controversial to this day TANKER

was followed by Operation Weser bung the invasion of Denmark and then Norway in 1940 the first joint air sea land campaign in the history of warfare Even more striking an achievement was the swift and conclusive defeat of France during May June 1940 Refusing to let its forces dash themselves against the fortifications of the Maginot Line Germany instead sent its divisions through neutral Belgium and northern France in Fall Gelb Case Yellow destroying Allied resistance and pursuing the remnant of the British and French forces to Dunkirk in an audacious and devastatingly effective assault During the course of Fall Rot Case Red over the following 20 days German forces pressed the attack and by 25 June had forced France s leaders into a humiliating capitulation Illustrated throughout with detailed maps artwork and contemporary photographs Blitzkrieg The Invasion of Poland to the Fall of France tells the story of these first breakneck attacks examining the armed forces leaders technology planning and execution in each campaign as well as the challenges faced by the Germans in the pursuit of this new and deadly form of warfare [Salazar](#) Filipe Ribeiro De Meneses,2013-10-18 The only complete political biography by a major Portuguese historian [Three's Company](#) Jack T.C. Arnold-Friend,1979 *Combat Biplanes of World War II* Peter C. Smith,2015-09-30 Aviation and maritime historian Peter C Smith reveals how both Allied and Axis powers used World War I era aircraft in *Combat Biplanes of World War II* The era of the combat biplane is usually thought to have been between 1914 and 1938 By the outbreak of World War II most of the advanced air forces of the world had moved on to monoplane aircraft for their front line battle forces both in bomber and fighter capacities Yet despite this many biplanes did still survive both in front line service and in numerous subsidiary roles and not just as training machines but as fully operational warplanes Thus in 1939 the majority of major European powers still retained some albeit few biplane aircraft Great Britain had the bulk of such obsolescent machines including the Gladiator Swordfish Walrus Vildebeeste and Audax while the inferior Albacore meant to replace the Swordfish had yet to enter service Germany still managed to conduct missions in which biplanes like the He 50 He 51 and Hs 120 excelled Both France and Italy had active biplanes Mussolini s Regia Aeronautica attaching great importance to the type as a fighter aircraft as late as 1941 while the Soviet Union also retained some machines like the Po 2 in front line service right through the war and beyond

By the time Japan and the United States entered the war two years later they had mainly rid themselves of biplanes but even here a few specialized types lingered on *Combat Biplanes of World War II* describes many of these gallant old warriors representing the author's own personal selection from a surprisingly large range of aircraft that despite all predictions fought hard and well
