Horrible Mothers Loïc Bourdeau,2019-12-01 For too long the main narratives of motherhood have been oppressive and exclusionary frequently ignoring issues of female identity especially regarding those not conforming to traditional female stereotypes Horrible Mothers offers a variety of perspectives for analyzing representations of the mother in francophone literature and film at the turn of the twenty first century in North America including Quebec Ontario New England and California Contributors reexamine the horrible mother paradigm within a broad range of sociocultural contexts from different locations to broaden the understanding of mothering beyond traditional ideology The selections draw from long established scholarship in women s studies as well as from new developments in queer studies to make sense of and articulate strategies of representation to show how contemporary family models are constantly evolving reshaping and moving away from heteronormative expectations and to reposition mothers as subjects occupying the center of their own narrative rather than as objects The contributors engage narratives of mothering from myriad perspectives referencing the works of writers or filmmakers such as Marguerite Andersen Nelly Arcan Gr goire Chabot Xavier Dolan Nancy Huston and Lucie Joubert

Communicating Gender in Context Helga Kotthoff, Ruth Wodak, 1997-01-01 The contributions to the book *Communicating Gender in Context* deal not only with grammatical gender but also with discursive procedures for constructing gender as a relevant social category in text and context Attention is directed to European cultures which till now have come up short in linguistic and discourse analytic gender studies e g Austria Spain Turkey Germany Poland and Sweden But also English speech communities and questions of English grammatical gender are dealt with In accordance with recent sociolinguistic research the contributors refrain from generalizing theses about how men and women normally speak no conversational style feature adheres so firmly to one sex as was thought in early feminism The studies however show that even today the feminine gender is often staged in a way that leads to situative asymmetry to the advantage of men The broader societal context of patriarchy does not determine all communicative encounters but demands particular efforts from women and men to be subverted

The Claims of Parenting Stefan Ramaekers, Judith Suissa, 2011-09-15 Many sociological historical and cultural stories can be and have already been told about why it is that parents in post industrial western societies face an often overwhelming array of advice on how to bring up their children At the same time there have been several philosophical treatments of the legal moral and political issues surrounding issues of procreation the rights of children and the duties of parents as well as some philosophical accounts of the shifts in our underlying conceptualization of childhood and adult child relationships While this book partly builds on the insights of this literature it is significantly different in that it offers a philosophically informed discussion of the actual practical experience of being a parent with its deliberations judgements and dilemmas In probing the ethical and conceptual questions suggested by the parent child relationship this unique volume demonstrates the irreducible philosophical richness of this relationship and thus provides an important counter balance to the overly empirical and largely psychological focus of a great deal of parenting literature Unlike other analytic work on the parent child relationship and the educational role of parents this work draws on first person accounts of the day to day experience of being a parent in order to explore the ethical and epistemological aspects of this experience In so doing it exposes the limitations of some of the

languages within which contemporary parenting is conceptualized and discussed and opens up a space for thinking about childrearing and the parent child relationship beyond and other than in terms of the languages which dominate the ways in which we generally think about it today

Transitional Objects in Early Childhood Amanda Norman, 2024-03-11 In this innovative book Amanda Norman looks at D W Winnicott's theory of Transitional Objects in early years practice the good enough parent and the relationship between the young child and primary carer in relation to the value of Transitional Objects Norman looks at how an understanding of psychological theories can be useful when caring for young children in both educational and research contexts aiding those interested in understanding therapeutic relationships and applying the principles to promote the use of Transitional Objects in their work Throughout the book Norman uses case studies from parents children and practitioner's perspectives in supporting physical and emotional development Through these she shows how observing Transitional Objects is particularly relevant to living in the west where a low touch high technology culture prevails compounded by the recent pandemic This volume contributes to a timely connection between the understanding and application of therapeutic approaches within early educational contexts Including engaging exercises at the end of each chapter this book is a perfect companion for those approaching the concept of Transitional Objects for the first time Transitional Objects in Early Childhood is vital reading for those with an interest in the psychology of the infant young child and their relationship and realities with the external world It will be of particular interest to those specialising in infant and child care who wish to develop their knowledge of emotional development through play as well as those working in a variety of social education and health contexts

The Political Clinic Carolyn Laubender, 2024-07-02 Winner 2025 Book Prize of the American Psychoanalytic Association For decades psychoanalysis has provided essential concepts and methodologies for critical theory and the humanities and social sciences But it is also inseparably a clinical practice and technique for treatment In what ways is clinical practice significant for critical thought What conceptual resources does the clinic hold for us today Carolyn Laubender examines cases from Britain and its former colonies to show that clinical psychoanalytic practice constitutes a productive site for novel political thought theorization and action She delves into the clinical work of some of the British Psychoanalytic Society's most influential practitioners including Anna Freud Melanie Klein Wulf Sachs D W Winnicott Thomas Main and John Bowlby exploring how they developed distinctive and politically salient practices Laubender argues that these figures transformed the clinic into a laboratory for reimagining race gender sexuality childhood nation and democracy By taking up the clinic as both a site of inquiry and realm of theoretical innovation she traces how political concepts such as authority reparation colonialism decolonization communalism and security at once informed and were reformed by each analyst's work While psychoanalytic scholarship has typically focused on its intellectual social and political effects outside of the clinic this interdisciplinary book combines history with feminist and decolonial social theory to recast the clinic as a necessarily politicized space Challenging common assumptions that psychoanalytic practice is or should be

neutral apolitical and objective The Political Clinic also considers what progressive clinical praxis can offer today

Shakespeare and the First Hamlet Terri Bourus,2022-06-10 The first edition of Hamlet often called Q1 shorthand for first quarto was published in 1603 in what we might regard as the early modern equivalent of a cheap paperback Yet this early version of Shakespeare s classic tragedy is becoming increasingly canonical not because there is universal agreement about what it is or what it means but because more and more Shakespearians agree that it is worth arguing about The essays in this collected volume explore the ways in which we might approach Q1 s Hamlet from performance to book history from Shakespeare s relationships with his contemporaries to the shape of his whole career

Design through Dialogue Karen A. Franck,Teresa von Sommaruga Howard,2010-02-15 Completed projects receive more public attention than the process of their creation and so the myth that architects design buildings alone lives on In fact architects work with a great many others and the relationships that develop particularly with clients have a significant impact on design Design through Dialogue explores the relationship between client and architect through the lens of four overlapping activities that occur during any project relating talking exploring and transforming Cases of design and collaboration range from smaller scale retail residential and educational projects in the US Sweden the UK and the Pacific Rim to large institutions including Seattle s Central Library the National Museum of the American Indian in Washington DC the Supreme Court in Jerusalem and the Museum of New Zealand Material is taken from interviews with clients and architects and research in psychotherapy group dynamics and design studies Throughout the book aspects of process are linked to design outcomes to illustrate how architects and clients collaborate creatively

Unlocking the World Claudia W. Ruitenberg,2015-12-03 Unlocking the World proposes hospitality as a guiding ethic for education Based on the work of Jacques Derrida it suggests that giving place to children and newcomers is at the heart of education The primary responsibility of the host is not to assimilate newcomers into tradition but rather to create or leave a place where they may arrive Hospitality as a guiding ethic for education is discussed in its many facets including the decentered conception of subjectivity on which it relies the way it casts the relation between teacher and student and its conception of curriculum as an inheritance that asks for a critical reception The book examines the relation between an ethic of hospitality and the

educational contexts in which it would guide practice Since these contexts are marked by gender culture and language it asks how such differences affect enactments of hospitality Since hospitality typically involves a power difference between host and guest the book addresses how an ethic of hospitality accounts for power whether it is appropriate for educational contexts marked by colonialism and how it might guide education aimed at social justice Advanced Personality David F. Barone, Michel Hersen, Vincent B. Van Hasselt, 2012-09-14 Embracing all aspects of personality study Advanced Personality addresses major established theories and vital current research topics in the field from the perspectives of both clinical and scholarly settings This impressive text reference features chapters that cover among other topics psychobiological theories of personality conscious and unconscious functioning and personality disorders from a trait perspective Written for entry level graduate and upper level undergraduate students the book includes an introductory chapter with a chronological table listing all major figures in the history of the field and tables that summarize key aspects of various theories *The Ethical Seduction of the Analytic Situation* Viviane Chetrit-Vatine, 2018-05-11 According to Jacques Andre the patient's encounter with the analyst is a scene of seduction the seductive statement being that of the fundamental rule or the invitation to address that which is most intimate or personal to a complete stranger But the practice of psychoanalysis can only unfold if there is a strict respect for ethics The words seduction and ethics which at first sight seem mutually exclusive are thus as the author shows at the heart of the analytic perspective The author takes as her starting point an encounter which is not necessarily consensual between Emmanuel Levinas thought and his conception of philosophy as ethics ethics understood as responsibility for the other and that of the psychoanalyst Jean Laplanche who posits the first adult other as a seducer of the young psyche from the outset due to the transmission of enigmatic messages compromised by his or her unconscious The analyst's ethical position is re-examined and with it the feminine maternal origins of the human capacity for responsibility for the other *Integrative Therapy* Maria Gilbert, Vanja Orlans, 2010-11-18 Integrative Therapy is a unifying approach that brings together physiological affective cognitive contextual and behavioural systems creating a multi-dimensional relational framework that can be created anew for each individual case Integrative Therapy 100 Key Points and Techniques provides a concise and accessible guide that allows professionals and students to look beyond specific approaches in order to draw upon ideas and techniques that will best help the client Divided into helpful sections areas of discussion include the case for an integrative approach to therapy the centrality of relationship and dimensions of self-development the process of integrative therapy techniques and strategies This book will be essential reading for all psychotherapists and counsellors both in practice and training who want to expand their perspectives and learn more about an integrative approach
