

mechanics and photographer with a 2004 BMW 330i

About this manual

its purpose

The purpose of this manual is to help you get the best value from your vehicle. It can do so in several ways. It can help you decide what work must be done, even if you choose to have it done by a dealer service department or a repair shop; it provides information and procedures for routine maintenance and servicing; and it offers diagnostic and repair procedures to follow when trouble occurs.

We hope you use the manual to tackle the work yourself. For many simpler jobs, doing it yourself may be quicker than arranging an appointment to get the vehicle into a shop and making the trip to leave it and pick it up. More importantly, a lot of money can be saved by avoiding the expense the shop must pass on to you to cover its labor and overhead

costs. An added benefit is the sense of satisfaction and accomplishment that you feel after doing the job yourself.

Using the manual

The manual is divided into Chapters. Each Chapter is divided into numbered Sections, which are headed in bold type between horizontal lines. Each Section consists of consecutively numbered paragraphs.

At the beginning of each numbered Section you will be referred to any illustrations which apply to the procedures in that Section. The reference numbers used in illustration captions pinpoint the pertinent Section and the Step within that Section. That is, Illustration 3.2 means the illustration refers to Section 3 and Step (or paragraph) 2 within that

Section.

Procedures, once described in the text, are not normally repeated. When it's necessary to refer to another Chapter, the reference will be given as Chapter and Section number. Cross references given without use of the word "Chapter" apply to Sections within paragraphs in the same Chapter. For example, "see Section 8" means in the same Chapter.

References to the left or right side of the vehicle assume you are sitting in the driver's seat, facing forward.

Even though we have prepared this manual with extreme care, neither the publisher nor the author can accept responsibility for any errors in, or omissions from, the information given.

NOTE

A Note provides information necessary to properly complete a procedure or information which will make the procedure easier to understand.

CAUTION

A Caution provides a special procedure or special steps which must be taken while completing the procedure where the Caution is found. Not heeding a Caution can result in damage to the assembly being worked on.

WARNING

A Warning provides a special procedure or special steps which must be taken while completing the procedure where the Warning is found. Not heeding a Warning can result in personal injury.

Introduction to the BMW 3-Series and Z4

The models covered by this manual are equipped with either a 2.5, 2.8 or 3.0 liter six-cylinder engine. These engines are of the Dual Overhead Camshaft (DOHC) design. They also are equipped with a computer-controlled ignition and fuel delivery system with electronic fuel injection.

Transmissions are either five- or six-speed manual or four- or five-speed automatic

with overdrive. Power is transmitted from the transmission to the rear axle through a two-piece driveshaft. The differential is bolted to a crossmember and drives the wheels through driveshafts equipped with inner and outer constant velocity joints.

The front suspension is of the MacPherson strut design, with the coil spring/shock absorber unit making up the upper suspension

unit. The rear suspension is a fully independent multi-link design. Power assisted rack-and-pinion steering is standard.

Power assisted front and rear disc brakes are standard on all models.

A wide range of standard and optional equipment is available for all models.
