A new generation of low-cost altitude indicating products makes RVSM affordable for a broad range of aircraft.

The AM-250 is available in gold or black.

The AM-250 integrates Honeywell's silicon pressure sensor and outstanding product support with the successful line of indicator products produced by its alliance partner, AMESSE Aerospace. The best of today's cost-effective technology is now available for a broad range of business jet and general aviation aircraft.

The AM-250 is a cost-effective solution for RVSM's dual altimetry system requirements on new and retrofitted light jets, such as the LearJet 600 and CitationJet.

The AM-250 Barometric Altimeter is an analog measuring product which incorporates Honeywell's highly accurate silicon pressure sensor, 10 ft Reduced Vertical Separation Minimum (RVSM) capable.

In addition to full analog and digital displays, the altimeter has two displays to indicate barometric offset in hectopascals or inches/millimeters of Hg. A rotary encoder and push button switch allow the entry of barometric offset and auto barometric set. The altimeter is internally lit to provide optimal viewing.
