Optimal health requires the integration balance and harmony of mind body spirit and emotions From comic relief and hatha yoga to guided mental imagery and music therapy this workbook contains more than 70 exercises that serve to integrate mind body and spirit as one dynamic force that can withstand the pressures of stress *Rights, Rivers and the Quest for Water Commons: The Case of Bangladesh* Imtiaz Ahmed, 2021-04-09

Right to water may sound novel and somewhat dramatic yet it has been central to the quest of human civilization for thousands of years One of the earliest references to water as common property can be found in the Jewish laws as early as 3000 BCE Similar views are also found in Islam In fact the Arabic word for Islamic law shari'ah originally meant the place from which one descends to water Since water is a gift from the divine to all living beings sharing water is regarded as holy duty This is found across religions regions societies and communities from New Zealand to Nigeria from Bangladesh to Brazil But then what transformed the divine sanction What led to the negation of the commons with sharing of the riverine water across territorial boundaries suffering the most The answer probably lies as much as in the politics of safeguarding one's personal or national interests as it is in the limitations imposed by our disciplinary understanding of things In this context a thorough reexamination even reconceptualization of some of the core issues is required Firstly the concept of water needs to be understood not as H₂O as it is done in physical sciences but as H₂O P₄ That is the meaning of water in social sciences must include not only twice hydrogen plus oxygen but also four P's pollution power politics and profit This is not to discount the science in the conceptualization of water but rather to add elements central to social sciences Secondly the concept of river needs to be redefined and understood not as a carrier of water as assumed in most of the Western languages but as nadi a flow consisting of prana life shakti power and atman soul as etymologically defined in most of the South Asian languages This comes closer to what critical hydrologists would say WEBS that is a river consists of water energy biodiversity and sediment In this light any fragmentation of transboundary river water in the name of sharing becomes an unworkable option unless of course a mechanism is found to share the water of the river along with its energy biodiversity and sediment and that again without distorting and harming the life of the river Thirdly the subject of water commons needs to be approached from the standpoint of rights of both human and river This is to flag the notion that nature including rivers has rights just like humans although their manifestations may be different In fact empowered humans particularly those in control of the state have more responsibility

than rights in dissuading themselves and others from creating conditions of human wrongs not only against fellow human beings but also against nature Finally if the rights of humans are to be ensured then there is an urgent need to reconceptualize and mainstream the human as a multiverse being This is because humans are not only political beings but also economic cultural ecological technological and psychological beings In this light if conflicts are to be contained then humans need to be empowered in all possible areas of life politics economics ecology culture technology and psychology This would certainly require empowering each and every person all at the same time receptive to nature in general and rivers in particular The book is designed to initiate a discourse on the civilizational quest for water commons indeed with the expectation that a discussion on rights and rivers would lead to a creative flow of ideas and practices
