Hamas, Popular Support and War in the Middle East Richard Davis, 2016-02-05 This book offers a new understanding of the nature of power seeking insurgent groups by empirically examining the use of violence by Hamas in the Palestinian Israeli Conflict Though Hamas has learned to ride the tides of popular support it remains suspended between its quest to achieve the values of its ardent supporters reclamation of land through force and the desire to grow popular support This tension is reflected in how and when the group exercises violent resistance The theoretical framework applied in this volume provides a simple construct to understand the dynamics that result in use and non use of violence under changing environmental conditions by Hamas but could be applied more broadly to other power seeking insurgent groups including ISIL The book weaves together the dynamics between violent actions and internal and external influences on Hamas including expressed values of the group Palestinian popular support measures leaders personalities and innovation weapons and tactics Israeli influence and targeted killings peace processes and conflicts in Gaza Syria Iraq and Egypt With newly assembled datasets on Hamas violent acts and public statements Israeli Targeted Killings historical measures of popular support and extensive field interviews the book offers a fresh perspective on insurgent group violence by demonstrating under what conditions the group exercises violence or refrains from doing so This book will be of much interest to both policy makers and students of the Arab Israeli conflict political violence Middle Eastern politics security studies and international relations in general

Demanding Devaluation David Steinberg, 2015-06-05 Exchange rate policy has profound consequences for economic development financial crises and international political conflict Some governments in the developing world maintain excessively weak and undervalued exchange rates a policy that promotes export led

development but often heightens tensions with foreign governments Many other developing countries overvalue their exchange rates which increases consumers purchasing power but often reduces economic growth In *Demanding Devaluation* David Steinberg argues that the demands of powerful interest groups often dictate government decisions about the level of the exchange rate Combining rich qualitative case studies of China Argentina South Korea Mexico and Iran with cross national statistical analyses Steinberg reveals that exchange rate policy is heavily influenced by a country s domestic political arrangements Interest group demands influence exchange rate policy and national institutional structures shape whether interest groups lobby for an undervalued or an overvalued rate A country s domestic political system helps determine whether it undervalues its exchange rate and experiences explosive economic growth or if it overvalues its exchange rate and sees its economy stagnate as a result

Policy-Making in the GCC Neil Quilliam,Mark C. Thompson,2017-09-11 The GCC is a major player in the post 2011 reordering of the Middle East Despite the rise in prominence of individual Gulf states especially Kuwait Qatar Saudi Arabia

and the United Arab Emirates and the growth of the GCC as a collective entity surprisingly little attention has been paid to the actual mechanics of policy making in the region This book analyses the vital role that institutions are coming to play in shaping policy in the Gulf Arab states The research coincides with two key developments that have given institutions new importance in the policy process the emergence of a new generation of leaders in the Gulf and the era of low oil prices Both developments along with dramatic demographic change have compelled state and citizens to re evaluate the nature of the social contract that binds them together Contributors assess the changing relationship between state and citizen and evaluate the role that formal and informal institutions play in mediating such change and informing policy The book shows how academic social and economic institutions are responding to the increasingly complex process of decision making where citizens demand better services and further empowerment and states are obliged to seek wider counsel although wanting to retain ultimate authority With contributions from both academics and practitioners this book will be highly relevant for researchers and policymakers alike Introducing the IB Diploma Programme Marc Abrioux, Jill Rutherford, 2013-02-14 Schools wishing to introduce the IB diploma programme are faced with major investment in terms of time effort and money in order to become authorised This manual is a resource for schools already offering the diploma as well as for prospective diploma schools **Pacific Futures** Warwick Anderson, Miranda Johnson, Barbara Brookes, 2018-11-30 How when and why has the Pacific been a locus for imagining different futures by those living there as well as passing through What does that tell us about the distinctiveness or otherwise of this sea of islands Foregrounding the work of leading and emerging scholars of Oceania Pacific Futures brings together a diverse set of approaches to and examples of how futures are being conceived in the region and have been imagined in the past Individual chapters engage the various and sometimes contested futures yearned for unrealized and even lost or forgotten that are particular to the Pacific as a region ocean island network destination and home Contributors recuperate the futures hoped for and dreamed up by a vast array of islanders and outlanders from Indigenous federalists to Lutheran improvers to Cantonese small business owners making these histories of the future visible In so doing the collection intervenes in debates about globalization in the Pacific and how the region is acted on by outside forces and postcolonial debates that emphasize the agency and resistance of Pacific peoples in the context of centuries of colonial endeavor With a view to the effects of the slow violence of climate change the volume also challenges scholars to think about the conditions of possibility for future thinking at all in the midst of a global crisis that promises cataclysmic effects for the region Pacific Futures highlights futures conceived in the context of a modernity coproduced by diverse Pacific peoples taking resistance to categorization as a starting point rather than a conclusion With its hospitable approach to thinking about history making and future thinking one that is open to a wide range of methodological epistemological and political interests and commitments the volume will encourage the writing of new histories of the Pacific and new ways of talking about history in this field the region and beyond *Security, Democracy and War Crimes* J. Gow, I.

Zverzhanovski,2013-10-23 This book examines how the war crime legacy resulting from the Yugoslav war of the 1990s on political and military transformation in Serbia was an impediment to security reform democratization and the achievement of Western standards in the Belgrade armed forces *Ciottone's Disaster Medicine* Gregory R. necessarily vociferously challenge the extremists strategies are not dismissive of the political role of Islam and the viability of an Islamic state However sectarian and scholastic schisms within Islam that date back to the prophet s demise do undermine any possibility of consensus about the legal institutional and policy parameters of the Islamic state Within its Shi a sectarian limitations this book attempts to offer some answers to questions about the nature of the Islamic state Nearly four decades of experience with the Islamic Republic of Iran offers us some insights into such a state s accomplishments potentials and challenges While the Islamic worldview offers a general framework for governance this framework is in dire need of modification to be applicable to modern societies As Iranians have learned in the realm of practical politics transcending the restrictive precepts of Islam is the most viable strategy for building a functional Islamic state Indeed Islam does provide both doctrinal and practical instruments for transcending these restrictions This pursuit of pragmatism could potentially offer impressive strategies for governance as long as sectarian scholastic and autocratic proclivities of authorities do not derail the rights of the public and their demand for an orderly management of their societies **IB Economics** George Graves,2012
