Kinetic Dynamic Suspension System Problems:

Vortex Processes and Solid Body Dynamics B. Rabinovich, A.I. Lebedev, A.I. Mytarev, 2012-12-06 a wise man knows all things in a manner in which this is possible not however knowing them individually Aristotle Metaphysics The problem of consideration of vortex fields influence on solid body dynamics has a long history One constantly comes upon it in flight dynamics of airplanes helicopters and other flying vehicles FV moving in the atmosphere in dynamics of ships with hydrofoils and in dynamics of rocket carriers RC and spacecrafts SC with liquid propellant rocket engines LPRE that are equipped with special damping devices and other structural elements inside fluid tanks Similar problems occur when solving problems related to attitude control and stabilization of artificial Earth satellites AES and spacecrafts with magnetic electro magnetic systems in conducting elements of which eddy currents are induced while control of those vehicles angular position It is also true with special test facilities for dynamic testing of space vehicles and their systems with modern high speed magnetic suspension transport systems those based on the phenomenon of magnetic levitation with generators having rotors carried in magnetic bearings and so on

Introduction to Hybrid Vehicle System Modeling and Control Wei Liu, 2013-02-08 This is an engineering reference book on hybrid vehicle system analysis and design an outgrowth of the author's substantial work in research development and production at the National Research Council Canada Azure Dynamics and now General Motors It is an irreplaceable tool for helping engineers develop algorithms and gain a thorough understanding of hybrid vehicle systems This book covers all the major aspects of hybrid vehicle modeling control simulation performance analysis and preliminary design It not only systemically provides the basic knowledge of hybrid vehicle system configuration and main components but also details their characteristics and mathematic models Provides valuable technical expertise necessary for building hybrid vehicle system and analyzing performance via drivability fuel economy and emissions Built from the author's industry experience at major vehicle companies including General Motors and Azure Dynamics Inc Offers algorithm implementations and figures examples extracted from actual practice systems Suitable for a training course on hybrid vehicle system development with supplemental materials An essential resource enabling hybrid development and design engineers to understand the hybrid vehicle systems necessary for control algorithm design and developments

Modelling and Analysis of Sustainability Related Issues in New Era Wen-Hsien Tsai, 2019-06-24 The purpose of this Special Issue is to investigate topics related to sustainability issues in the new era especially in Industry 4.0 or other new manufacturing environments Under Industry 4.0 there have been great changes with respect to production processes production planning and control quality assurance internal control cost determination and other management issues Moreover it is expected that Industry 4.0 can create positive sustainability impacts along the whole value chain There are three pillars of sustainability including environmental sustainability economic sustainability and social sustainability This Special Issue collects 15 sustainability related papers from various industries that use various methods or models such as mathematical programming

activity based costing ABC material flow cost accounting fuel consumption model artificial intelligence AI based fusion model multi attribute decision model MADM and so on These papers are related to carbon emissions carbon tax Industry 4.0 economic sustainability corporate social responsibility CSR etc The research objects come from China Taiwan Thailand Oman Cyprus Germany Austria and Portugal Although the research presented in this Special Issue is not exhaustive this Special Issue provides abundant significant research related to environmental economic and social sustainability Nevertheless there still are many research topics that require our attention to solve problems of sustainability

Applied Mechanics Reviews, 1973

Vehicle Dynamics of Modern Passenger Cars Peter Lugner, 2018-05-22 The book provides the essential features necessary to understand and apply the mathematical mechanical characteristics and tools for vehicle dynamics including control mechanism An introduction to passenger car modeling of different complexities provides the basics for the dynamical behavior and presents vehicle models later used for the application of control strategies The presented modeling of the tire behavior also for transient changes of the contact patch properties shows the necessary mathematical descriptions used for the simulation of the vehicle dynamics The introduction to control for cars and its extension to complex applications using e.g. observers and state estimators is a main part of the book Finally the formulation of proper multibody codes for the simulation leads to the integration of all parts Examples of simulations and corresponding test verifications show the profit of such a theoretical support for the investigation of the dynamics of passenger cars

Robust Control Engineering Mario Garcia-Sanz, 2017-06-26 This book thoroughly covers the fundamentals of the QFT robust control as well as practical control solutions for unstable time delay non minimum phase or distributed parameter systems plants with large model uncertainty high performance specifications nonlinear components multi input multi output characteristics or asymmetric topologies The reader will discover practical applications through a collection of fifty successful real world case studies and projects in which the author has been involved during the last twenty five years including commercial wind turbines wastewater treatment plants power systems satellites with flexible appendages spacecraft large radio telescopes and industrial manufacturing systems Furthermore the book presents problems and projects with the popular QFT Control Toolbox QFTCT for MATLAB which was developed by the author

Polymer Gears Sabu Thomas, Miroslav Huskić, Hanna J. Maria, Jože Tavčar, 2024-11-16 Polymer Gears discusses polymer gear design and their efficient mechanical properties light weight and low noise during operation As plastic gears are replacing metallic gears in traditional and new applications there is still lack of material characterization and complex relations between different geometric and operating parameters Thus polymer gear design remains an open challenge This book serves as a comprehensive and professional guide on the topic providing readers with current developments carried out in the field of plastic gears production characterization and applications This will include material development tribological properties simulations and processing methods Current developments carried out in the field of plastic gear production Presents the characterization of plastic gear production Includes applications of plastic

gear production and development Provides updates on tribological properties simulations and processing methods

Dynamics of Coupled Systems in High-Speed Railways Weihua Zhang, 2019-11-25 Dynamics of Coupled Systems in High Speed Railways Theory and Practice presents the relationship between various coupled systems that can affect train operation including interaction between track and train the pantograph catenary system and train power supply system and train and airflow and train with respect to the structure and characteristics of high speed railway The overall simulation optimization and control are achieved based on an analysis of the dynamics generated by coupled systems in high speed trains with a theoretical framework for the dynamics presented in the book Presents the first book available on the dynamics of coupled systems in high speed trains Provides a systematic view of high speed vehicle dynamics covering the issues that are especially concerned for high speed operations such as high speed pantograph and catenary aerodynamic characteristics and running stability of high speed trains Covers the optimization of dynamic performance the design of parameters the simulation of high speed train service processes and the identification of high speed train state and condition assessment
