

# THE BACTERIA KINGDOM

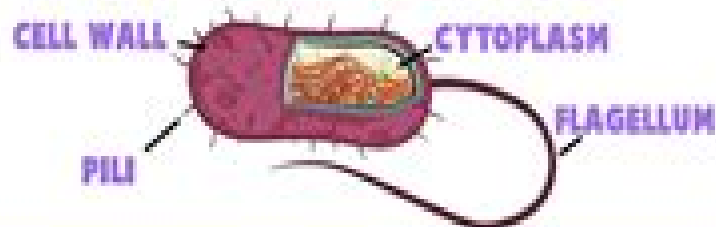

Bacteria are the simplest organisms on Earth. They are unicellular and are so small that they are only visible through a microscope. Their cells have no defined nucleus, so the internal components are dispersed in the cytoplasm. Most have a cell wall.

Bacteria reproduce very rapidly and there are many different types.

Some bacteria, such as cyanobacteria, can produce their own food. There are some other bacteria, such as bacillus, that eat other living things.
