- Medical evaluation (brief history, limited physical and pelvic examination)
- Prompt referral and transfer if the woman requires treatment beyond the capability of the facility where she is seen

- a. Lack of understanding of and attention to women's reproductive health needs on the part of providers

A number of factors limit provision of family planning services to women who have experienced an abortion. These factors, which increase a woman's risk of repeated unwanted pregnancies, include:

- Lack of understanding of and attention to women's reproductive health needs on the part of providers
- Lack of services for some groups of women (e.g., adolescents, single women)

- a. All communicable diseases should be reported to the nearest health station
- b. To acquire a marriage license, couple should receive instructions on family planning and responsible parenthood
- c. Newborn screening should be performed after 24 hours following delivery of the newborn

A newborn that must be placed in intensive care in order to ensure survival may be exempted from the 3-day requirement but must be tested by seven (7) days of age. A parent or legal guardian may refuse testing on the grounds of religious beliefs, but shall acknowledge in writing their understanding that refusal of testing places their newborn at risk for undiagnosed heritable conditions. The DOH shall be the lead agency in implementing this Act. Option A: RA 3573. Option B: PD 965. Option D: PD 996

Reference: RA 9288

5. A postpartum client asks the nurse, "What are the disorders tested in newborn screening?" The nurse accurately responds by stating: a. "These are Congenital Hypothyroidism, Congenital Adrenal Hyperplasia, Galactosemia, PKU, and G6PD deficiency"
