

RÉSUMÉ

Depuis quelque temps, la formation à distance de même que la préoccupation pour l'environnement prennent de plus en plus d'importance dans notre société. Bien qu'à première vue ces deux sujets semblent ne pas avoir grand chose en commun, tel n'est pas nécessairement le cas.

L'une des caractéristiques principales de la formation à distance est qu'elle permet à l'apprenant d'apprendre à partir de chez lui. L'aspect écologique découlant alors de la réduction du besoin de déplacement semble présent ainsi qu'intéressant à être étudié davantage. Il semble de plus très approprié de vérifier si d'autres de ses caractéristiques peuvent aussi correspondre à une pensée dite écologique.

Les implications réelles liées aux différentes caractéristiques écologiques de la formation à distance seront aussi examinées afin de voir à quel niveau l'aspect écologique a vraiment sa place en formation à distance.

Mots-clés : écologie, formation, environnement.

INTRODUCTION

Lorsque nous pensons à la formation à distance, les deux éléments les plus évidents qui ressortent sont souvent que ce type d'apprentissage peut être fait à partir de son domicile et que les cours permettent un horaire d'étude flexible. En plus de ces deux éléments, la formation à distance offre évidemment plusieurs autres avantages.

Dans un premier temps, selon certains auteurs¹:

La formation à distance est devenue, dans plusieurs pays du monde, un moyen essentiel pour rendre accessible la connaissance sur de grands territoires (Zentgraf, 1992), pour rejoindre des populations qui n'ont pu fréquenter les institutions scolaires en place (Patoine, 1995) mais aussi, de plus en plus, comme une occasion de questionner l'enseignement traditionnel (Alicia, 1992) et de resituer l'apprentissage (l'apprenant) au centre du processus d'éducation (Deschênes et Lebel, 1994).

Dans un deuxième temps, la formation à distance semble aussi offrir certains avantages au niveau des implications de type écologique.

L'objectif de ce travail est de tenter de déterminer comment la formation à distance aide (ou a le potentiel d'aider) au niveau écologique, c'est-à-dire laisse le moins d'empreintes néfastes sur la planète.

Premièrement, afin de réaliser cet objectif certains éléments clés reliés à la formation à distance seront soulevés. Deuxièmement, les implications environnementales reliées à chacun des éléments soulevés, ainsi que d'autres implications environnementales pertinentes, seront traitées.

Plus précisément, pour les fins de ce travail, l'endroit, le déplacement et le matériel de cours seront les éléments clés traités. Comment se comparent ces éléments lorsqu'il est question d'apprentissage traditionnel (face à face) et en formation à distance? Plus précisément, quelles sont les implications environnementales reliées à ces éléments? La formation à distance est-elle nettement supérieure du point de vue écologique à l'enseignement traditionnel? Finalement, quel rôle doit jouer l'écologie en matière de formation à distance?

Lamour Agrave Distance Rockrose Eacuteepisode
