Gordon,2012-05-23 *Skill Wars* shows how to increase productivity and profits by making investments in human capital development It addresses the disparity between the available jobs and available workers By education and training only 20% of all American workers can fit well into our demanding high tech workplace How do we train the 80% *Skill Wars* defines the race between advanced technology investment and human resources investment and shows managers how to measure that investment It introduces a Human Capital Scoreboard of seven new business management measurement tools including a more accurate calculation of ROI Return on Investment for employee performance improvement programs It also provides case studies of how quality training can deliver on more problem solving thinking skills It has a foreword by Joseph Boyett author of *The Guru Guide* and *Workplace 2000* *Skill Wars* is a basic workplace performance primer that presents complex issues in a simple language and format that will move both business leaders and the American public to give their popular support There are few viable alternatives Gordon believes that Only at great peril can Americans continue to largely ignore the workplace as an important arena that helps structure learning for life **Semiconductor Design and Implementation Issues in Integrated Vehicle Electronics** John H. Hall,2005 This major research study provides a fresh critical look at the way automobile electronics are and should be built Written by Silicon Valley pioneer John Hall this book is based on his nearly 40 years of experience in developing and producing semiconductors for the automobile industry and other customers Highly readable and comprehensible for even beginning students of electronics and semiconductor design this volume provides an in depth explanation of the factors to be considered when building vehicle systems Starting with a concise history of vehicle electronics Hall walks the reader through the environmental conditions faced by these systems and the variety of failure mechanisms that can occur Basic and advanced semiconductor issues raised by vehicle implementation are then discussed in detail A wide range of issues confronting designers from over marketing of risky features to time and cost constraints are explained Complex electronic modules from many different manufacturers are examined and discussed as real world case studies of good and bad design techniques Hall concludes by providing design recommendations that will allow vehicle electronics system developers to build much tougher devices at little or no incremental production cost This book is the first major work to focus on key issues emerging as major causes of safety and performance problems Vehicle makers increasingly

seek market advantages by providing ever more capable electronics in their products While these features add much value to vehicles they fail in ways that are beyond the experience and comprehension of most technicians and accident investigators By combining decades of design experience and innovation with extensive research Hall has produced unique insights and explanations so engineers can prevent most or perhaps all of these problems John Hall is one of Silicon Valley s most prolific independent pioneers and inventors He founded Union Carbide s semi conductor operation in 1962 He is a founder of Interstil and Micro Power Systems He is the inventor of the first electronic watch first LCD digital watch first CMOS liquid crystal display hand held calculator color autofocus cameras among many successful commercial products He has worked for many American and foreign automakers on specific projects such as integrated two way radios and seat belt interlocks He is working with DoD on hardening electronics systems against non nuclear events
