Language Education And Discourse Functional Approaches:

Language, Education and Discourse Joseph Foley, 2005-12-05 This collection of essays by leading functional linguists presents the latest perspectives on language and discourse in educational settings The book questions the idea of discourse to reveal that the social processes of learning are imbued with the ideologies of the society and education system within which learning takes place The contributors take into account the historical and cross cultural perspectives of both classroom practices and the student's own awareness of the ideological meanings of language activities Language Education and Discourse is divided into two sections Part one covers early childhood and the growing development of a language system from the basic semiotic system of the infant This is followed by an analysis of the beginnings of literacy in kindergarten the introduction to writing in primary school and the ideological content of reading material Part two furthers this analysis by looking at discourse in secondary and tertiary education The contributors pose questions about the role and importance of teaching grammar in the school system and finally examine how to refine the discourse of education This book will be useful to academics interested in the latest functional perspectives on language as it is used in education

Testing the Untestable in Language Education Amos Paran, Lies Sercu, 2010 The testing and assessment of language competence continues to be a much debated issue in foreign language teaching and research This book is the first one to address the testing of four important dimensions of foreign language education which have been left largely unconsidered learner autonomy intercultural competence literature and literary competence and the integration of content and language learning Each area is considered through a theoretical framework followed by two empirical studies raising questions of importance to all language teachers How can one test literary competence Can intercultural competence be measured What about the integrated assessment of content and language in CLIL and teaching Is progress in autonomous learning skill gaugeable The book constitutes essential reading for anyone interested in the testing and assessment of seemingly largely untestable aspects of foreign language competence The title of this book is well chosen Despite the apparent oxymoron this collection of papers succeeds in addressing important issues of educational policy and theory with the precision born of empirical work combined with discussion of principles This book will open new options for testers for teachers and for those who make policy decisions Michael Byram School of Education University of Durham UK
