Questions Veneeta Dayal, 2016-11-03. This book synthesizes and integrates 40 years of research on the semantics of questions and its interface with pragmatics and syntax conducted within the formal semantics tradition. A wide range of topics are covered including weak/strong exhaustiveness, maximality, functional answers, single/multiple/trapped list answers, embedding, predicates, quantificational variability, concealed questions, weak islands, polar and alternative questions, negative polarity and non-canonical questions. The literature on this rich set of topics is theoretically diverse and scattered across multiple venues; is often hard to assimilate. Veneeta Dayal, drawing on her own research, brings them together for the first time in a coherent, concise and well-structured whole. Each chapter begins with a non-technical introduction to the issues discussed; semantically sophisticated accounts are then presented incrementally, with the major points summarized at the end of each section. Written in an accessible style, this book provides both a guide to one of the most vibrant areas of research in natural language and an account of how this area of study is developing. It will be a unique resource for the novice and expert alike and seeks to appeal to a variety of readers without compromising depth and breadth of coverage.

Assessment in the Second Language Writing Classroom Deborah Crusan, 2010-07. *Assessment in the Second Language Writing Classroom* is a teacher and prospective teacher friendly book, uncomplicated by the language of statistics. The book is for those who teach and assess second language writing in several different contexts: the IEP, the developmental writing classroom and the sheltered composition classroom. In addition, teachers who experience a mixed population or teach cross-cultural composition will find the book a valuable resource. Other books have thoroughly covered the theoretical aspects of writing assessment, but none have focused as heavily as this book does on pragmatic classroom aspects of writing assessment. Further, no book to date has included an in-depth examination of the machine scoring of writing and its effects on second language writers. Crusan not only makes a compelling case for becoming knowledgeable about L2 writing assessment but offers the means to do so. Her highly accessible, thought-provoking presentation of the conceptual and practical dimensions of writing assessment, both for the classroom and on a larger scale, promises to engage readers who have previously found the technical detail of other works on assessment off-putting, as well as those who have had no previous exposure to the study of assessment at all.
