Competition Law, Regulation and SMEs in the Asia-Pacific Michael T Schaper, 2017-03-09 Small and medium sized enterprises SMEs account for more than 90 per cent of all businesses in the Asia Pacific region an area which is rapidly updating its competition laws and regulations to encourage greater entrepreneurship and open dynamic economies Yet SMEs are almost invisible when those competition policies and laws are developed and enforced SMEs are often quite different businesses than large multinational corporations but their nature significance and characteristics are often overlooked This

book seeks to rectify the relative neglect in research and policy discussions on the role of the SME sector in competition policy and law Drawing on contributions from a wide range of competition regulators lawyers academics consultants and advisers to the SME sector it addresses such important issues as perceptions and views of small businesses about competition law regulator engagement and education of the SME sector the link between competition law and economic growth franchising SMEs and competition law issues in enforcing competition law against SMEs the role of Chinese family firms trade professional and industry associations country case studies from Vietnam Singapore Indonesia Malaysia China South Korea Hong Kong SAR Japan and the Pacific Islands

Comparative Climate Change Litigation: Beyond the Usual Suspects Francesco Sindico, Makane Moïse Mbengue, 2021-01-21 This book is based on the acknowledgment that climate change is a multifaceted challenge that requires action on the part of all stakeholders including civil society and the notion that climate change is at a tipping point with urgent measures needed in the next decade Against this background civil society is turning its attention to the courts as a means to directly influence climate action partly because of the global scepticism towards the progress of global climate action despite the ongoing implementation of the Paris Agreement Focusing on the individual broadly representing civil society the book offers fresh perspectives on climate change litigation While most of the literature on climate change litigation examines the same specific jurisdictions mostly common law countries US and Australia in particular this book also considers specific countries in Asia Africa and Latin America with little or no climate change litigation It explores the reasons for the lack of litigation and discusses what measures should or could be taken to change this situation and push forward climate action Unlike other literature on the subject this book analyses climate change litigation using a scenario based methodology Combining rigorous academic analysis with a practical policy oriented focus the book provides valuable insights for a wide range of stakeholders interested in climate change litigation It appeals to civil society organisations around the world international organisations and law firms interested in climate change litigation

The International Law on Foreign Investment M. Sornarajah, 2021-07 The only work that goes beyond the rules of law looking at the origins and conflicts that shaped the law

Solidarity and Rule of Law Teresa Russo, Anna Oriolo, Gaspare Dalia, 2023-07-12 This book offers an authentic and original perspective on the principles of solidarity and rule of law that are variously interconnected and increasingly invoked in international relations and affairs especially in the context of the European Union where they are among the founding values common to all Member States The innovative approach the authors adopt consists in the joint reading of these two principles within the broader framework of EU security

thus offering a new interpretation and fertile ground for further research Divided into four parts the authors consider EU security to be linked to the implementation of both these principles particularly with regard to EU stabilization and enlargement to the Western Balkans cross border security migration and asylum management criminal justice and human rights and police and judicial cooperation The contributions of eminent scholars international experts and practitioners are the book s greatest strength In addition it offers a valuable new perspective on the study of contemporary issues affecting the Western Balkans but also all Member States and the Union itself Therefore the book is an essential resource for students and scholars of EU law but also for lawyers and professionals involved in criminal proceedings or working in the field of human rights

The Report: Myanmar 2017 Oliver Cornock,2017 In recent years trade and investment in Myanmar have soared buoyed by ongoing efforts to liberalise the economy and a successful political transition in November 2015 that saw the National League for Democracy become the country s first civilian led government elected to power in modern history Political reforms have brought significant economic benefits as the US government moved to lift burdensome sanctions that had weighed on investor sentiment and trade growth With the administration now moving to implement a host of domestic reforms loosen internal trade restrictions and draft a new investment law growth is expected to resume apace following a slowdown during the election year

Fitness to Plead Ronnie Mackay,Warren Brookbanks,2018-06-14 The law relating to fitness to plead is an increasingly important area of the criminal law While criminalization may be justified whenever an offender commits a sufficiently serious moral wrong requiring that he or she be called to account the doctrine of fitness to plead calls this principle into question in the case of a person who lacks the capacity or ability to participate meaningfully in a criminal trial In light of the emerging focus on capacity based approaches to decision making and the international human rights requirement that the law should treat defendants fairly this volume offers a benchmark for the theory and practice of fitness to plead providing readers with a unique opportunity to consider differing perspectives and debate on the future development and direction of a doctrine which has up till now been under discussed and under researched The fitness to plead rules stand as an exception to notions of public accountability for criminal wrongdoing yet despite the doctrine s long standing function in criminal procedure it has proven complex to apply in practice and has given rise to many varied legislative models and considerable litigation in different jurisdictions Particularly troublesome is the question of what is to be done with someone who has been found unfit to stand trial Here the law is required to balance the need to protect those defendants who are unable to participate effectively in their own trial whether

permanently or for a defined period and the need to protect the public from people who may have caused serious social harm as a result of their antisocial behaviour The challenge for law reformers legislators and judges is to create rules that ensure that everyone who can properly be tried is tried while seeking to preserve confidence in the fairness of the legal system by ensuring that people who cannot properly engage in the criminal trial process are not forced to endure it
