

# Eureka Math Module 1 - Ratios and Proportional Relationships

## Exercise

The table below shows 6 different-sized pans that could be used to make macaroni and cheese. If the ratio of ingredients stays the same, how might the recipe be altered to account for the different sized pans?  $\frac{3}{4}$

Noodles (cups) $x$	Cheese (cups) $y$	Pan Size (number of cups)
		5
3	$\frac{3}{4} \div 3 = \frac{1}{4}$	$3 + \frac{3}{4} = 3\frac{3}{4}$
1	$\frac{1}{3} \div \frac{1}{4} = \frac{4}{3}$	$1 + \frac{1}{4} = 1\frac{1}{4}$
$\frac{2}{3}$ $\frac{UR}{\frac{1}{4}}$	$\frac{1}{6}$	$\frac{2}{3} + \frac{1}{4} = \frac{5}{6}$
$5\frac{1}{3}$ $\frac{UR}{\frac{1}{4}}$	$1\frac{1}{3}$	$5\frac{1}{3} + 1\frac{1}{3} = 6\frac{2}{3}$
		$5\frac{5}{8}$

\*The only pair given to us here is

3 cups noodles to  $\frac{3}{4}$  cup of cheese;

1. Divide to get our constant rate

2. Use the rate to calculate the  $x$  and  $y$  values

3. Find the total pan size

4. Isolate a new  $x, y$  ratio table

noodles + cheese = pan size

officials continue to push money into projects with disastrous ecological and human rights consequences despite early and persistent protests of Bank staff He shows how repeatedly and without political accountability the Bank has increased its support for regimes that torture and murder their subjects from Ceaucescu's Romania to Suharto's Indonesia *Mortgaging the Earth* explains the so called pressure to lend that emerges as a leitmotif in the Bank's fifty year history and shows how this institutional dynamic has taken on a damaging life of its own Rich traces the history of the Bank from its inception at Bretton Woods where it was conceived as a way to funnel reconstruction loans for war torn Europe through the surreally top down tenure of Robert McNamara to the Rio de Janeiro Earth Summit At Rio governments poured billions of dollars more into the Bank to save our global environment while the Bank financed new ecological disasters The World Bank Rich demonstrates in a provocative history of development from Descartes to Max Weber to Chico Mendes is a crucible of the goals of the modern age goals that in the very moment of their worldwide triumph have become problematic He shows how the Bank's dilemmas mirror our global civilization's crisis of values and gives expert prescription for reform *Mortgaging the Earth* makes disturbingly clear why every American should be concerned about the World Bank as a critical arena where the global politics of technology development and the environment are played out on a small planet one where the stakes are increasingly for keeps

Lesh,Eric Hamilton,James J. Kaput,2020-10-07 The central question addressed in Foundations for the Future in Mathematics Education is this What kind of understandings and abilities should be emphasized to decrease mismatches between the narrow band of mathematical understandings and abilities that are emphasized in mathematics classrooms and tests and those that are needed for success beyond school in the 21st century This is an urgent question In fields ranging from aeronautical engineering to agriculture and from biotechnologies to business administration outside advisors to future oriented university programs increasingly emphasize the fact that beyond school the nature of problem solving activities has changed dramatically during the past twenty years as powerful tools for computation conceptualization and communication have led to fundamental changes in the levels and types of mathematical understandings and abilities that are needed for success in such fields For K 12 students and teachers questions about the changing nature of mathematics and mathematical thinking beyond school might be rephrased to ask If the goal is to create a mathematics curriculum that will be adequate to prepare students for informed

citizenship as well as preparing them for career opportunities in learning organizations in knowledge economies in an age of increasing globalization how should traditional conceptions of the 3Rs be extended or reconceived Overall this book suggests that it is not enough to simply make incremental changes in the existing curriculum whose traditions developed out of the needs of industrial societies The authors beyond simply stating conclusions from their research use results from it to describe promising directions for a research agenda related to this question The volume is organized in three sections Part I focuses on naturalistic observations aimed at clarifying what kind of mathematical thinking people really do when they are engaged in real life problem solving or decision making situations beyond school Part II shifts attention toward changes that have occurred in kinds of elementary but powerful mathematical concepts topics and tools that have evolved recently and that could replace past notions of basics by providing new foundations for the future This section also initiates discussions about what it means to understand the preceding ideas and abilities Part III extends these discussions about meaning and understanding and emphasizes teaching experiments aimed at investigating how instructional activities can be designed to facilitate the development of the preceding ideas and abilities Foundations for the Future in Mathematics Education is an essential reference for researchers curriculum developers assessment experts and teacher educators across the fields of mathematics and science education
