Pevtsova, 2021-09-30 Math Hour Olympiads is a non standard method of training middle and high school students interested in mathematics where students spend several hours thinking about a few difficult and unusual problems When a student solves a problem the solution is presented orally to a pair of friendly judges Discussing the solutions with the judges creates a personal and engaging mathematical experience for the students and introduces them to the true nature of mathematical

proof and problem solving This book recounts the authors experiences from the first ten years of running a Math Hour Olympiad at the University of Washington in Seattle The major part of the book is devoted to problem sets and detailed solutions complemented by a practical guide for anyone who would like to organize an oral olympiad for students in their community In the interest of fostering a greater awareness and appreciation of mathematics and its connections to other disciplines and everyday life MSRI and the AMS are publishing books in the Mathematical Circles Library series as a service to young people their parents and teachers and the mathematics profession

**Leningrad Mathematical Olympiads (1961-1991)** Dmitri V Fomin, 2025-01-24 This book covers thirty years of the Leningrad Mathematical Olympiad which was ostensibly the very first formally organized open official city level mathematical contest in the world Founded in 1934 by a group of dedicated Soviet mathematicians it played an outstanding and often underappreciated role in creating the Leningrad St Petersburg school of mathematics of the 20th century The book begins with the extensive introduction containing two prefaces one of them written specifically for this edition a large historical survey of the Leningrad Mathematical Olympiad a section describing the logistical side of the contest and a small chapter dedicated to the very first Mathematical Olympiad held in 1934 whose problems were recently found in the Soviet era library archives The main text contains approximately 1 100 highly original questions for students of grades 5 through 10 ages 11 12 through 17 18 offered at the two concluding rounds of the Leningrad City Mathematics Olympiads in the years of 1961 1991 Full solutions hints and answers are provided for all questions with very rare exceptions It also includes 120 additional questions offered at the various mathematical contests held in Leningrad over the same thirty year period on average their difficulty is somewhat higher than that of the regular Mathematical Olympiad problems

The Colorado Mathematical Olympiad: The Third Decade and Further Explorations Alexander Soifer, 2017-04-27 Now in its third decade the Colorado Mathematical Olympiad CMO founded by the author has become an annual state wide competition hosting many hundreds of middle and high school contestants each year This book presents a year by year history of the CMO from 2004 2013 with all the problems from the competitions and their solutions Additionally the book includes 10 further explorations bridges from solved Olympiad problems to real mathematics bringing young readers to the forefront of various fields of mathematics This book contains more than just problems solutions and event statistics it tells a compelling story involving the lives of those who have been part of the Olympiad their reminiscences of the past and successes of the present I am almost speechless facing the ingenuity and inventiveness demonstrated in the problems proposed in the third decade of these Olympics However equally impressive is the drive and persistence of the originator and living soul of them It is hard for me to imagine the enthusiasm and commitment needed to work singlehandedly on such an endeavor over several decades Branko Gr nbaum University of Washington

After decades of hunting for Olympiad problems and struggling to create Olympiad problems he has become an extraordinary connoisseur and creator of Olympiad problems The Olympiad problems were very good from the beginning

but in the third decade the problems have become extraordinarily good Every brace of 5 problems is a work of art The harder individual problems range in quality from brilliant to work of genius The same goes for the Further Explorations part of the book Great mathematics and mathematical questions are immersed in a sauce of fascinating anecdote and reminiscence If you could have only one book to enjoy while stranded on a desert island this would be a good choice ii i psup supp ppiLike Gauss Alexander Soifer would not hesitate to inject Eureka at the right moment Like van der Waerden he can transform a dispassionate exercise in logic into a compelling account of sudden insights and ultimate triumph ii i pp Cecil Rousseau Chair USA Mathematical Olympiad Committee ppiA delightful feature of the book is that in the second part more related problems are discussed Some of them are still unsolved ii i pp Paul Erd s ppiThe book is a gold mine of brilliant reasoning with special emphasis on the power and beauty of coloring proofs Strongly recommended to both serious and recreational mathematicians on all levels of expertise i p Martin Gardner      *Leningrad Mathematical Olympiads 1987-1991* Dmitriï Vladimirovich Fomin,Alekseï Kirichenko,1994
