Market as a Weapon Anton Oleinik, 2017-09-08 Power is all encompassing in Russia and mediates most interactions among people including everyday decisions Even the recent administrative reforms in the country which began at the end of the 1990s have tried to reshape the government institutions and modernize the country through the use of power Changes were initiated and implemented by people vested with power Power convention and trust can all support coordination However in the Russian institutional context power tends not only to supplement the alternative coordination mechanisms but also to substitute them

Power can be used to solve problems related to social action by merging two or several centers of decision making into one. The actor vested with power decides exactly how coordination and adjustment can be achieved. This path breaking volume shows how power turns into a unique coordination mechanism and what are consequences of such transformation for everyday life and businesses. *Market as a Weapon* focuses on issues of power and domination using the configuration of power relationships in Russia as a critical case but goes far beyond a narrowly defined scope of country specific studies. Particular emphasis is put on domination by virtue of a constellation interests in the market since this is a relatively underexplored yet broadly used technique for imposing will in all countries that heavily rely on interventionist policies. Instead of being a liberating force the market becomes an additional instrument facilitating the continuous reproduction of power which explains the title of the book. Both qualitative and quantitative data including more than one hundred in depth interviews with experts state servants and businesspeople in Russia as well as statistics are used throughout the text of this major book.

Reforming the State Without Changing the Model of Power? Anton Oleinik, 2013-10-18. This book places administrative reform in post socialist countries in a broad context of power and domination. This new perspective clarifies the reasons why reforms went awry in Russia and some other post Soviet countries whereas they produced positive outcomes in the Baltic States and most East European countries. The contributors analyse the idea that administrative reform cannot produce sustainable changes in the organization of the state apparatus as long as it does not touch the underpinning model of power and domination. Using an interdisciplinary and comparative approach the essays combine elements of philosophy sociology political science and economics including a wealth of primary and secondary data surveys in depth interviews with state representatives and participant observation. The book focuses on Russia and analyses recent developments in this country by the way of comparison with the experience of carrying out administrative reform in Ukraine Bulgaria Poland Germany and North America. This book was published as a special issue of the *Journal of Communist Studies and Transition Politics*.
