**Contact Lines for Electric Railways** Friedrich Kiessling,Rainer Puschmann,Axel Schmieder,Egid Schneider,2018-01-03  
Electric traction is the most favourable type of power supply for electric railways from both an ecological and an economic perspective In the case of urban mass transit and high speed trains it is the only possible type of traction Its reliability largely depends on contact lines which must operate in all climatic conditions with as high availability and as little maintenance as possible Extreme demands arise when overhead contact lines are required to provide reliable and safe power transmission to traction vehicles travelling at speeds in excess of 250 km h The authors have used their worldwide experience to provide comprehensive descriptions of configuration mechanical and electrical design installation operation and maintenance of contact lines for local and long distance transportation systems including high speed lines In this book railway company professionals and manufacturers of contact line systems students and those embarking on a career in this field will find practical guidance in the planning and implementation of systems product descriptions specifications and technical data including standards and other regulations Special emphasis is laid on the interaction of the individual components of power supply especially between contact lines and pantographs Since large sections of the book are dedicated to system aspects consultant engineers can also use it as a basis for designing systems as well as interfaces to other subsystems of electric railway engineering The contents of the book are rounded off by examples of running systems    **Proceedings of the Electrical Society of Cornell University** Electrical Society of Cornell University,1901
