Computer Systems Ata Elahi, 2022-03-16 This updated textbook covers digital design fundamentals of computer architecture and ARM assembly language. The book starts by introducing computer abstraction, basic number systems, character coding, basic knowledge in digital design and components of a computer. The book goes on to discuss information representation in computing, Boolean algebra and logic gates and sequential logic. The book also presents introduction to computer architecture, Cache mapping methods and virtual memory. The author also covers ARM architecture, ARM instructions, ARM assembly language using Keil development tools and bitwise control structure using C and ARM assembly language. The book includes a set of laboratory experiments related to digital design using Logisim software and ARM assembly language programming using Keil development tools. In addition, each chapter features objectives, summaries, key terms, review questions and problems.

Learning GIS Using Open Source Software Kakoli Saha, Yngve K. Frøyen, 2021-12-07 This book introduces the usage, functionality and application of data in geographic information systems (GIS) for geo spatial analysis. It offers knowledge on GIS tools and techniques and explains how they can be applied in real world projects to architects and planners in the Indian and the Greater South Asian context using open source software. The volume explains concepts on planning and architectural tasks, their data methods and requirements followed and includes GIS related exercises on the same tasks. It takes the reader through the concepts of geo spatial analysis and its referencing system while quoting examples from India. Further, the content of the book will help the planners involved in preparing GIS based master planning for cities under the Atal Mission for Rejuvenation and Urban Transformation (AMRUT) scheme. See Glossary for details. A practical guidebook providing a step by step guide to learn open source GIS, this book will be useful for students, scholars and professionals from the field of architecture and planning, geography and other spatial sciences, instructors of GIS courses on planning and architecture, urban and regional planners, transport planners, urban design, landscape architects, environmental planners, departments of town and country planning and development authorities. It will also be useful for anyone interested in the geospatial analysis.
