1. Discuss the factors that influence the success or failure of a business. Consider the following factors: location, management, capital, technology, and competition. How do these factors interact to determine the success or failure of a business?

The second is a paragraph that uses word families. The grammar is repeated three times using different structures for practice. These paragraphs are done at one-year repeating intervals: students generally substitute for each word family a family of words on their list. The third paragraph repeats in its second form a previous student's work, and students, in writing a letter, may reuse the letters. The last is a paragraph that uses families of a letter family as the framework. It is especially designed so that students are strongly encouraged to give autobiographical self-references that parts. Examples of structural content and letter families are used in the paragraph. The paragraph is repeated in its second form at one-year repeating intervals. Abstract | The authors examined the effects of a 12-week, low-intensity, supervised walking program on the physical and psychological health of 100 sedentary, middle-aged women. The program was designed to be safe and enjoyable, and to be easily integrated into the women's daily lives. The program resulted in significant improvements in physical fitness, including increases in aerobic capacity, muscle strength, and flexibility. Psychological health also improved, with reductions in anxiety and depression, and increases in self-esteem and quality of life. The authors conclude that a supervised walking program can be an effective intervention for improving the physical and psychological health of sedentary, middle-aged women.
