Borderless Africa Francis Mangeni, Andrew Mold, 2024-04-18 The African Continental Free Trade Area established in 2018 represented a monumental step forward for Africa in terms of meeting longstanding aspirations for greater economic and political integration But it has nonetheless been met with scepticism in some quarters both within the continent and beyond Borderless Africa makes the case for the AfCFTA in an accessible and compelling way without shying away from technical and academic debates Francis Mangeni and Andrew Mold take us on a journey through the different dimensions and implications of the AfCFTA the largest free trade zone in the world starting with its underlying economic rationale Pointing to the numerous historical examples of successful regional integration they argue that the African continent will need to take on board such lessons as the agreement is implemented They discuss too the more controversial elements of the AfCFTA including the freedom of movement protocol contending that this should not be seen as an optional extra but as an intrinsic part of the accord Also exploring the role of external partners

in the construction of an economically stronger more united Africa this fascinating study reveals how the AfCFTA is contributing to sustainable development across the continent Handbook of Research in Educational Communications and Technology M. J. Bishop, Elizabeth Boling, Jan Elen, Vanessa Svihla, 2020-09-21 The 5th edition of the prestigious AECT Handbook continues previous efforts to reach outside the traditional instructional design and technology community to the learning sciences and computer information systems communities toward developing a conceptualization of the field However given the pervasive and increasingly complex role technology now plays in education since the 1st edition of the Handbook in 1996 the editors have reorganized the research chapters in this edition to focus on the learning problems we are trying to solve with educational technologies rather than to focus on the things we are using to solve those problems Additionally for the first time this edition of the Handbook reflects our field's growing understanding of the importance of design scholarship to inform practice by including design case chapters These changes for this edition of the Handbook are intended to bring educational technology research into the broader framework of educational research by elaborating on the role instructional design and technology plays as a scholarly discipline in addressing education's increasingly complex issues Provides comprehensive reviews of new developments in educational technology research and design practice Includes concrete examples to guide future research and practice in the ways emerging technologies can be used to solve educational problems Contains extensive references furnished to guide readers to the most recent research and design practice in the field of instructional design and technology *Architecture and the Smart City* Sergio M. Figueiredo, Sukanya Krishnamurthy, Torsten Schroeder, 2019-10-18 Increasingly the world around us is becoming smart From smart meters to smart production from smart surfaces to smart grids from smart phones to smart citizens Smart has become the catch all term to indicate the advent of a charged technological shift that has been propelled by the promise of safer more convenient and more efficient forms of living Most architects designers planners and politicians seem to agree that the smart transition of cities and buildings is in full swing and inevitable However beyond comfort safety and efficiency how can smart design and technologies assist to address current and future challenges of architecture and urbanism *Architecture and the Smart City* provides an architectural perspective on the emergence of the smart city and offers a wide collection of resources for developing a better understanding of how smart architecture smart cities and smart systems in the built environment are discussed designed and materialized It brings together a range of international thinkers and practitioners to discuss smart systems through four thematic sections Histories and Futures Agency and Control Materialities and Spaces and Networks and Nodes Combined these four thematic sections provide different perspectives into some of the most pressing issues with smart systems in the built environment The book tackles questions related to the future of architecture and urbanism lessons learned from global case studies and challenges related to interdisciplinary research and critically examines what the future of buildings and cities will look like Education Policy and the Political Right Grant Rodwell, 2021-12-28 This work

attempts a comparative description and analysis focusing on the US the UK and Australia on the topic of the Right educational policy and schooling It adopts as its underlying theme the burning fuse in tracing the topic back to Joseph de Maistre a Rightist who fled revolutionary France to seek safety in the company of Tsar Alexander I s Russian Empire Here he had much to say about school education not for all but rather the deserving social elite During the past three or four decades in the US the UK and Australia the Right has been remarkably successful in amassing political power And in doing so the right of politics in these countries has reshaped school educational policy and practice a necessary step in securing the future of the Right as a political force Moreover even during the years the Right has been on the opposition benches in these countries such has been the strength of their political force that governments of the Left have acquiesced to much of their school educational policy A pioneering effort this book asserts that to understand school educational policy in the third decade of the 21st century we need to comprehend the politics of the Right This book will be of interest to researchers and postgraduate students interested in Education Studies Theory and Policy and International and Comparative Education

Rupturing the Dialectic Harry Cleaver, 2017-04-17 A central figure for anti authoritarian Marxists and radicals who see the working class as an autonomous force capable of acting independently and not simply reacting to the depredations of capitalism Harry Cleaver brings this vision up to date interpreting capitalism s latest crises and demonstrating how ordinary people can and do rupture the smooth functioning of the system that exploits them [China's Soft Power and Higher Education in South Asia](#) Romi Jain, 2021-05-17 This empirical work illuminates how China uses the higher education mechanism in South Asia to advance its national interests and investigates the outcomes for China including both challenges and opportunities Using a soft power theoretical framework this book employs the case study of Nepal a South Asian country of profound geostrategic value for the two competing powers of China and India Illustrating how higher education is the mechanism for achieving soft power goals it draws on data analysis based on archival sources and interviews with China and South Asia experts including academics and politico bureaucratic elites as well as interviews with Nepalese students and alumni Importantly though this book advances an innovative conceptual model of geointellect to trace the evolving dimensions of China s global dominance in higher education research and innovation paradigm especially in the context of the Belt and Road Initiative and ultimately reveals how foreign policy and higher education policy reinforce each other in the context of China China s Soft Power and Higher Education in South Asia provides an empirically rich resource for students and scholars of education international relations Asian studies and China s soft power [The Oxford Handbook of Identities in Organizations](#) Andrew D. Brown, 2020-01-16 Conceived as the meanings that individuals attach to their selves a substantial stockpile of theory related to identities accumulated across the arts social sciences and humanities over many decades continues to nourish contemporary research on self identities in organizations In times which are more reflexive narcissistic and fluid the identities of participants in organizations are increasingly less fixed and less certain making identity issues both

more salient and more interesting Particular attention has been given to processes of identity construction often styled identity work Research has focused on how why and when such processes occur and their implications for organizing and individual group and organizational outcomes This has resulted in a burgeoning stream of research from discursive dramaturgical symbolic socio cognitive and psychodynamic perspectives that most often casts individuals efforts to fabricate identities as intentional relational and consequential Seemingly intractable debates centred on the nature of identities their relative stability or fluidity whether they are best regarded as coherent or fractured positive or not and how they are fabricated within relations of power combined with other conceptual issues continue to invigorate the field However these debates have also led to some scepticism regarding the future potential of identities research Yet as the chapters in this Handbook demonstrate there are considerable grounds for optimism that identity as root metaphor nexus concept and means to bridge levels of analysis has significant potential to generate multiple compelling streams of theorizing in organization and management studies

Law and Society Steven Barkan, 2023-07-11 The new third edition of Law and Society provides a balanced multidisciplinary and comprehensive overview of law as an essential social institution that both shapes and is shaped by society Between this book s covers readers will find the theoretical and conceptual contributions of anthropologists historians law professors political scientists philosophers psychologists and sociologists By synthesizing this wide range of perspectives the book provides readers with a nuanced and in depth context to think about discuss and analyze current trends issues and events Through this book readers will also grasp the many ways law affects the lives of individuals and more generally how law and society affect each other in matters such as dispute settlement criminal law social movements inequality and social control The third edition is brought up to date with the helpful reorganization of chapters Separate chapters exploring how we define law the differences among the major families of law and dispute processing make the textbook more readable and adaptable to specific course objectives Thorough revisions across the chapters reflect the latest sociolegal perspectives and research and include many new references and contemporary examples to help students appreciate a wide range of law and society issues This thoughtful and stimulating introduction to the field is ideal for advanced undergraduate courses in Law and Society and Introduction to Law
