Economics , Apostles of Development David C. Engerman, 2025-05-30 The battle against global poverty that began
after World War II was a major undertaking engaging economists engineers and organizations Featuring front and centre
were six remarkable economists Amartya Sen Manmohan Singh Mahbub ul Haq Jagdish Bhagwati Rehman Sobhan and Lal
Jayawardena all born as colonial subjects in the British Empire and studied at Cambridge University They represented a new
figure on the world scene the Third World development expert and played a crucial role in global debates about poverty and
development Apostles of Development examines their different economic doctrines and the ongoing debate surrounding
economic theory in poor countries compared to rich ones The lives of these apostles reveal how development did not begin
with textbooks but with real world attempts to solve very specific and pressing problems Finally the book emphasizes that
development was a Global South project first and foremost aiming to improve the conditions of the world's poorest countries
It challenges the conventional wisdom that sees development only as a tool of rich countries to dominate or as proof of their
humanitarian spirit It argues that development succeeds not when it follows ideological prescriptions but when it looks for
what works The fading of grand visions shaped by ideological concerns has been one of the lasting effects of the end of the
Cold War The book argues that the best way forward is determined modesty focusing on practical matters such as addressing
gross inequality and insisting that development means more than just economic growth Given the salience of questions of
economic inequality and the constant visibility of the promises and problems of economic development in the world today this
is a timely and important read **Economic Papers** , 2003
