Ethnobotany Of Tuberculosis In Laos Springerbriefs In Plant Science:

Ethnobotany of Tuberculosis in Laos Bethany Gwen Elkington,Djaja Djendoel Soejarto,Kongmany Sydara,2014-11-11 This book highlights the common ground between biomedicine and traditional healing Because of the destruction of forests the degradation of old palm leaf manuscripts and decreasing interest in traditional medicine by younger generations it is becoming more and more important to record medicinal plant knowledge before it is lost This research provides written and photographic documentation of some of the medicinal plant knowledge held by the people of Laos Translating and validating some of the power of traditional medicine used in Laos into biomedical terms through laboratory analyses may serve to demonstrate its importance in a global language In this text the translational research was performed through in vitro laboratory analyses of select plant species with a history to treat symptoms of TB The processes of plant collection extraction biological assays and isolation elucidation are also described and detailed in the Biochemical Validation section The biomedical discoveries explored in Ethnobotany of Tuberculosis in Laos stresses the importance of conserving and sustaining our natural ecosystems for medicinal preservation and utilization

Medicinal Plants of Laos Djaja Djendoel Soejarto,Bethany G. Elkington,Kongmany Sydara,2023-05-22 This book provides a description of medicinal plants of Laos including their role in maintaining healthcare among the population their potential as a source for new medicinal compounds their preservation and their importance for the well being of the communities for present and future generations The focus of this book is to draw on the rich culture folklore and environment of medicinal plants in the country This is an opportunity to describe medicinal plants from a scientifically underrepresented area with the hope of making an important contribution to the knowledge of the region for academics scientists and anyone who has interest in Laos Features Describes terrestrial medicinal plants from a scientifically underrepresented region Includes a wider variety of plants found growing in Laos than has previously been published Discusses past and present research on medicinal plants that may lead to the discovery of new medicines Describes efforts in the preservation of these medicinal plants for present and future generations Focuses on the rich culture folklore and environment of medicinal plant in Laos Provides an important contribution to knowledge of the region and will benefit anyone interested in the medicinal plants of Laos

Ethnobotany for Beginners Ulysses Paulino Albuquerque,Marcelo Alves Ramos,Washington Soares Ferreira Júnior,Patrícia Muniz de Medeiros,2017-02-14 Designed for new scholars this book features a quick and easy to read discussion of ethnobotany along with its major developments The language is clear and concise objective and straightforward and structured to lead the reader from the beginning of this science to the most recent developments While there are some books on ethnobotany mainly dealing with methods this book covers the topic in an introductory and comprehensive text that prepares the reader for more advanced study of ethnobotany

Fighting Multidrug Resistance with Herbal Extracts, Essential Oils and Their Components Philip G. Kerr,2013-05-24 In the search for successful antitubercular treatments investigators have often turned their efforts to ethnobotany

ethnopharmacology and phytochemistry Since many of the world's peoples have well developed systems of traditional medicine with plants and their extracts as a major component and many of these plants have been used to treat tuberculosis indigenous herbal medicine is a logical starting point for a research program The major aims in this chapter are to summarize current antitubercular treatments look for structural patterns in molecules that have been used successfully in the therapeutics of tuberculosis examine published evidence of natural products derived principally from macrophytic species with an anecdotal reputation as antitubercular treatments or that have been deliberately tested for antitubercular activity and identify promising structural classes of plant metabolites that can serve as lead compounds Finally I would like to indicate some of the directions being followed by leading researchers in the field and suggest ways forward in drug discovery to treat multidrug resistant tuberculosis
