Ett Memorandum November 2014

Cathryn Costello, Mark Freedland

Ett Memorandum November 2014:

Migrants at Work Cathryn Costello, Mark Freedland, 2014-10-30 There is a highly significant and under considered intersection and interaction between migration law and labour law Labour lawyers have tended to regard migration law as generally speaking outside their purview and migration lawyers have somewhat similarly tended to neglect labour law The culmination of a collaborative project on Migrants at Work funded by the John Fell Fund the Society of Legal Scholars and the Research Centre at St John's College Oxford this volume brings together distinguished legal and migration scholars to examine the impact of migration law on labour rights and how the regulation of migration increasingly impacts upon employment and labour relations Examining and clarifying the interactions between migration migration law and labour law contributors to the volume identify the many ways that migration law as currently designed divides the objectives of labour law privileging concerns about the labour supply and demand over worker protective concerns In addition migration law creates particular forms of status which affect employment relations thereby dividing the subjects of labour law Chapters cover the labour laws of the UK Australia Ireland Israel Italy Germany Sweden and the US References are also made to discrete practices in Brazil France Greece New Zealand Mexico Poland and South Africa These countries all host migrants and have developed systems of migration law reflecting very different trajectories Some are traditional countries of immigration and settlement migration while others have traditionally been countries of emigration but now import many workers There are nonetheless common features in their immigration law which have a profound impact on labour law for instance in their shared contemporary shift to using temporary labour migration programmes Further chapters examine EU and international law on migration labour rights human rights and human trafficking and smuggling developing cross jurisdictional and multi level perspectives Written by leading scholars of labour law migration law and migration studies this book provides a diverse and multidisciplinary approach to this field of legal interaction of interest to academics policymakers legal practitioners trade unions and migrants groups alike

Cable and Wireless Networks Mário Marques da Silva, 2018-09-03 Cable and Wireless Networks Theory and Practice presents a comprehensive approach to networking cable and wireless communications and networking security It describes the most important state of the art fundamentals and system details in the field as well as many key aspects concerning the development and understanding of current and emergent services In this book the author gathers in a single volume current and emergent cable and wireless network services and technologies Unlike other books which cover each one of these topics independently without establishing their natural relationships this book allows students to quickly learn and improve their mastering of the covered topics with a deeper understanding of their interconnection It also collects in a single source the latest developments in the area typically only within reach of an active researcher Each chapter illustrates the theory of cable and wireless communications with relevant examples hands on exercises and review questions suitable for readers with a BSc degree or an MSc degree in

computer science or electrical engineering This approach makes the book well suited for higher education students in courses such as networking telecommunications mobile communications and network security This is an excellent reference book for academic institutional and industrial professionals with technical responsibilities in planning design and development of networks telecommunications and security systems and mobile communications as well as for Cisco CCNA and CCNP exam preparation

The Report: Mongolia 2014 Oxford Business Group,2014-05-23 Since the country's transition from communism two decades ago the Mongolian economy has experienced rapid liberalisation Sectors including ICT and insurance are expanding quickly and while the mining sector has been responsible for making Mongolia a rising star in the global economy there is great potential for further growth in all economic sectors Politically stable and rich with natural resources Mongolia has emerged as a bellwether for investor confidence in recent years The 2013 commercialisation of the Oyu Tolgoi gold and copper mine is helping to diversify Mongolia's mineral exports away from coal while the government is working to improve the investment environment by adopting the new Investment Law among other measures Challenges do exist however from the long harsh winters that slow construction to the difficulty of connecting the sparsely populated nation through ICT and transport systems In response the government has partnered with the private sector on a number of fronts in order to promote economic diversification and competitiveness

Decarbonization in the European Union Sebastian Oberthür,2015-06-25 The authors examine how far internal policies in the European Union move towards the objective of reducing greenhouse gas emissions in the EU by 80 95 per cent by 2050 and how or whether the EU's 2050 objective to decarbonise could affect the EU's relations with a number of external energy partners

Detering Russia in Europe Nora Vanaga,Toms Rostoks,2018-09-21 This edited volume examines deterrence and the defense efforts of European states neighboring Russia following the Crimean intervention Deterrence after being largely absent from debates among academics and policy makers for almost a quarter of a century has made a comeback in Europe Since Russia's annexation of Crimea and the start of the military conflict in Ukraine's Donbass region eastern and northern European states have revised their assessments of Russia's policies and intentions The approach used by Russia in Ukraine has rendered lessons learned from the Cold War deterrence only partially applicable due to the changing security

situation in Europe The emergence of the cyber realm a smaller emphasis on nuclear deterrence and the ideological conflict between Russia and the West are among the key differences between the Cold War and the current security environment Structured into two parts the first part discusses conceptual aspects of deterrence while the second discusses ten country case studies which include both NATO and non NATO countries This allows for an in depth analysis of the changing character of deterrence and its practical application by Russia s European neighbours This volume will be of much interest to students of strategic studies European politics Russian foreign policy security studies and international relations in general

Lawyer, 2014-04 **Principles of Corporate Finance Law** Eilís Ferran, Elizabeth Howell, Felix Steffek, 2023-09-21

Corporate finance theory seeks to understand how incorporated firms address the financial constraints that affect their investment decisions This is achieved by using varied financial instruments that seek to give holders different claims on the firm s assets Recent scholarship in this area has highlighted the critical importance of the legal environment in explaining the choices that companies make about their capital structure This book combines company law capital markets law and aspects of commercial and insolvency law to give readers a detailed understanding of the legal and regulatory issues relating to corporate finance Informed by insights from theoretical and empirical work the book examines from a legal perspective the key elements of corporate financing structures and capital markets in the UK The authors practical experience of transactions and regulatory issues ensures that thorough scholarly inquiry and critical reflection are complemented by an assured understanding of the interface between legal principles and rules as they are documented and in their actual operation Key developments covered in this third edition include the post Brexit adaptation of UK company law and capital market regulation important new cases on parent company liability in tort creditor facing duties of directors issuer and director liability for misleading statements to the market alternatives to public market financing and recent changes in the practice of debt finance such as the emergence of non bank lenders **Architecture and Retrenchment** Helena

Mattsson, 2023-01-26 Shortlisted for the Architects Sweden Critic s Award 2023 Scholars in architectural and urban history have over the last decade been trying to come to terms with architecture s neoliberal turn and its various impacts from municipal policy to the artistic imagination However most scholarship has focussed on generalizations with very little work to date focussing on specific cases Architecture and Retrenchment brings one such case to the fore investigating the relation between architecture and the Swedish Model of the welfare state It tracks the response of architecture to the gradual retrenchment and ultimate dismantling of the Swedish welfare state which was in its heyday world famous for its integration of architecture and the built environment into the welfare system Ultimately neoliberal economics prevailed yet this book reveals how new architectural strategies and techniques were developed in order to protect the agency of architecture in the newly reorganised society of the 1980s and 1990s Through eight in depth case studies the book situates the often abstract

generalised discourse of neoliberalism and privatisation in specific architectural sites and provides an original interpretation of how architecture space aesthetics and politics converged at the end of the twentieth century **Yearbook of**

This revisionist history of succession to the throne in early modern Russia from the Moscow princes of the fifteenth century to Peter the Great argues that legal primogeniture never existed the monarch designated an heir that was usually the eldest son only by custom not by law Overturning generations of scholarship Paul Bushkovitch persuasively demonstrates the many paths to succession to the throne where designation of the heir and occasional elections were part of the relations of the monarch with the ruling elite and to some extent the larger population Exploring how the forms of designation evolved over the centuries as Russian culture changed and in the later seventeenth century made use of Western practices this study shows how when Peter the Great finally formalized the custom in 1722 by enshrining the power of the tsar to designate in law this was not a radical innovation but was in fact consistent with the experience of the previous centuries *The Soviet Union and Cold War Neutrality and Nonalignment in Europe* Mark Kramer, Aryo Makko, Peter Ruggenthaler, 2021-03-22 The Soviet Union and Cold War Neutrality and Nonalignment in Europe examines how the neutral European countries and the Soviet Union interacted after World War II Amid the Cold War division of Europe into Western and Eastern blocs several long time neutral countries abandoned neutrality and joined NATO Other countries remained neutral but were still perceived as a

threat to the Soviet Union's sphere of influence Based on extensive archival research this volume offers state of the art essays about relations between Europe's neutral states and the Soviet Union during the Cold War and how these relations were perceived by other powers

Robotics, AI and the Future of Law Marcelo Corrales, Mark Fenwick, Nikolaus Forgó, 2018-11-02 Artificial intelligence and related technologies are changing both the law and the legal profession In particular technological advances in fields ranging from machine learning to more advanced robots including sensors virtual realities algorithms bots drones self driving cars and more sophisticated human like robots are creating new and previously unimagined challenges for regulators These advances also give rise to new opportunities for legal professionals to make efficiency gains in the delivery of legal services With the exponential growth of such technologies radical disruption seems likely to accelerate in the near future This collection brings together a series of contributions by leading scholars in the newly emerging field of artificial intelligence robotics and the law The aim of the book is to enrich legal debates on the social meaning and impact of this type of technology The distinctive feature of the contributions presented in this edition is that they address the impact of these technological developments in a number of different fields of law and from the perspective of diverse jurisdictions Moreover the authors utilize insights from multiple related disciplines in particular social theory and philosophy in order to better understand and address the legal challenges created by AI Therefore the book will contribute to interdisciplinary debates on disruptive new AI technologies and the law
