- *European Commission Guidelines on Vertical Restraints - 2010/C 130/01*
- **Vertical restraints** = agreements or concerted practices entered into between two or more companies each of which operates, for the purposes of the agreement, at a **different level of the production or distribution chain**, and relating to the **conditions under which the parties may purchase, sell or resell certain goods or services**.
- Vertical restraints are generally less harmful than horizontal restraints and may provide substantial scope for efficiencies.
- In most cases, competition concerns can only arise if there is **insufficient competition at one or more levels of trade**.

Restrictions of EU Competition Law in the Digital Age Bernadette Zelger, 2023-06-28 This book offers an in depth legal analysis concerning the notion of restrictions of competition be it by object restrictions according to Article 101 TFEU or prima facie abusive practices treated according to the form based approach under Article 102 TFEU Although extensive research has been conducted on the notion of object infringements of competition there is no systematic review of this topic covering both competition provisions namely Articles 101 and 102 TFEU This book fills that gap by providing an extensive analysis of the relevant case law while also covering new phenomena stemming from the digital revolution and its impact on the functioning of traditional markets In this regard particular attention is paid to the concept of prima facie infringements and the analysis necessary for their successful establishment Object restrictions and object abuses are not infringements per se in the sense that they can be established in the abstract and without consideration of the actual legal and economic context context analysis within which a measure is implemented Hence the indispensable context analysis is informed by the potential economic effects of a given measure Examining the changes regarding the economic reality and how markets work in the digital economy this book makes a valuable contribution to the current debate about whether our competition law toolkit is fit and proper to deal with the challenges posed by digitalization The author argues that while there is a coherent framework covering both Treaty competition provisions as regards object restrictions of competition the increased use of an actual effect analysis and thus the concept of a restriction of competition by effect represents an underestimated and underused weapon for combating measures that are ambivalent from a competition law perspective as regards their anticompetitive or non detrimental nature in a digital economy

The Crossroads of Competition Law and Energy Regulation Laura Rimšaitė, 2024-11-15 This book explores the delicate balance between fostering competitive energy markets and ensuring effective regulation It addresses the difficulty of reconciling competitive market dynamics with regulatory objectives such as ensuring reliability fairness and sustainability In the highly dynamic energy sector the convergence of competition law and energy regulation is a critical factor that greatly influences the trajectory of energy markets The intersection of these significant domains can be complex and transformative when the goals of fostering fair competition and

guaranteeing dependable and eco friendly energy provision coincide Market power in the energy sector can lead to a concentration of power among a handful of firms which can hinder competition and limit consumer options The dual objective of tackling market dominance and promoting energy security constitutes a significant challenge In turn the book discusses the challenges posed by natural monopolies in energy networks the need for regulatory frameworks to support investment in infrastructure and renewable energy and the complexities of price fluctuations The topic of market dominance is also considered as dominant corporations are capable of controlling prices and suppressing competition resulting in higher prices for consumers and stifling innovation The book offers valuable perspectives on creating a regulatory framework that promotes fair competition and achieves long term policy goals in the energy sector To do so it draws on case studies and analyses from various countries *Cassis de Dijon* Albertina Albors-Llorens, Catherine Barnard, Brigitte Leucht, 2021-02-25
