is currently divided into 14 subspecialty areas by the American Society for Photobiology The first 14 chapters of this book deal with those subspecialty areas each written by a leader in the field Chapter 15 entitled New Topics in Photobiology highlights areas of research that may be designated subspecialties of photobiology in the future This book has been written as a textbook to introduce the science of photobiology to advanced undergraduate and graduate students The chapters are written to provide a broad overview of each topic They are designed to contain the amount of information that might be presented in a one to two hour general lecture The references are not meant to be exhaustive but key references are included to give students an entry into the literature Frequently a more recent reference that reviews the literature will be cited rather than the first paper by the author making the original discovery Whenever practical a classroom demonstration or simple laboratory exercise has been provided to exemplify one or more major points in a chapter
