F21june 2013 Past Paper:

A New Scramble for Africa? Sören Scholvin, 2016-03-03 Global energy consumption will increase rapidly in the next decades. The discrepancy between demand and supply is worrisome within the old and new cores of the world economy. Sub-Saharan Africa meanwhile possesses vast potential for energy resources to be further exploited. Whilst the Global North is a traditional player in the sub-Saharan energy sector, new actors from emerging economies, especially China's state-owned enterprises, but also Brazilian, Indian and South African giants have entered what appears to be a scramble for the largely untapped energy resources of the region. This book is the first to bring together comparative perspectives on the strategies of state and non-state actors involved in the exploitation of sub-Saharan energy resources. The potential and pitfalls of new forms of cooperation on energy southwards of the Sahara. The domestic opportunities and challenges of the present energy resource boom. Dynamics on the international level are brought together with local developments to provide up-to-date insights on the scramble for energy resources in sub-Saharan Africa. This book also advances a materialist approach applicable in geographical and political scientific research, showing that much insight can be gained by concentrating on the material environment that shapes economic and political phenomena. **Administrative Justice in Wales and**

Comparative Perspectives Sarah Nason, 2017-09-15 This book offers a unique understanding of what administrative justice means in Wales and for Wales, whilst also providing an expert and timely analysis of comparative developments in law and administration. It includes critical analysis of distinctly Welsh administrative laws and redress measures, whilst examining contemporary administrative justice issues across a range of common and civil law European and international jurisdictions. Key issues include the roles of commissioners, administrative courts, tribunals and ombudsmen in devolved and federal nations and evolving relationships between citizens and the state, especially in the context of localisation and austerity, and will be of interest to legal and public administration professionals at home and internationally. **Citizens, Civil Society**

and Heritage-Making in Asia Hsin-Huang Michael Hsiao, 2018-02-14 This volume is based on papers from the second in a series of three conferences that deal with the multi-scalar processes of heritage making, ranging from the local to the national and international levels, involving different players with different degrees of agency and interests. These players include citizens and civil society, the state and international organizations and actors. The current volume focuses on the role of citizens and civil society in the politics of heritage making, looking at how these players at the grass-roots level make sense of the past in the present. Who are these local players that seek to define the meaning of heritage in their everyday lives? How do they negotiate with the state or contest the influence of the state in determining what their heritage is? These and other questions will be taken up in various Asian contexts in this volume to foreground the local dynamics of heritage politics.

Ways to improve tumor uptake and penetration of drugs into solid tumors Fabrizio Marcucci, Angelo Corti, Ronald Berenson, 2014-12-05 The main scope of this topic is to give an update on pharmacologic and non pharmacologic approaches to enhance uptake and penetration of cancer drugs into tumors Inadequate accumulation of drugs in tumors has emerged over the last decade as one of the main problems underlying therapeutic failure and drug resistance in the treatment of cancer Insufficient drug uptake and penetration is causally related to the abnormal tumor architecture Thus poor vascularization increased resistance to blood flow and impaired blood supply represent a first obstacle to the delivery of antitumor drugs to tumor tissue Decreased or even inverted transvascular pressure gradients compromise convective delivery of drugs Eventually an abnormal extracellular matrix offers increased frictional resistance to tumor drug penetration Abnormal tumor architecture also changes the biology of tumor cells which contributes to drug resistance through several different mechanisms The variability in vessel location and structure can make many areas of the tumor hypoxic which causes the tumor cells to become quiescent and thereby resistant to many antitumor drugs In addition the abnormally long distance of part of the tumor cell population from blood vessels provides a challenge to delivering cancer drugs to these cells We have recently proposed additional mechanisms of tumor drug resistance which are also related to abnormal tumor architecture First increased interstitial fluid pressure can by itself induce drug resistance through the induction of resistance promoting paracrine factors Second the interaction of drug molecules with vessel proximal tumor cell layers may also induce the release of these factors which can spread throughout the cancer and induce drug resistance in tumor cells distant from blood vessels As can be seen abnormal tumor architecture inadequate drug accumulation and tumor drug resistance are tightly linked phenomena suggesting the need to normalize the tumor architecture including blood vessels and or increase the accumulation of cancer drugs in tumors in order to increase therapeutic effects Indeed several classes of drugs that we refer to as promoter drugs have been described that promote tumor uptake and penetration of antitumor drugs including those that are vasoactive modify the barrier function of tumor vessels debulk tumor cells and overcome intercellular and stromal barriers In addition also non pharmacologic approaches have been described that enhance tumor accumulation of effector drugs e g convection enhanced delivery hyperthermia etc Some drugs that have already received regulatory approval e g the anti VEGF antibody bevacizumab exert antitumor effects at least in part through normalization of the tumor

vasculature and enhancement of the accumulation of effector drugs Other drugs acting through different mechanisms of action are now in clinical development e g NGR TNF in phase II III studies and others are about to enter clinical investigation e g JO 1

The Earth Charter, Ecological Integrity and Social Movements Laura Westra, Mirian Vilela, 2014-06-20 The Earth Charter is a declaration of fundamental ethical principles for building a just sustainable and peaceful global society with ecological integrity as a major theme This book provides a series of analyses of ecological integrity as it relates to the Earth Charter social movements and international law for human rights It is shown how the Earth Charter project began as a United Nations initiative but it was carried forward and completed by a global civil society initiative The drafting of the Earth Charter involved the most inclusive and participatory process of its time ever associated with the creation of an international declaration This process is the primary source of its legitimacy as a guiding ethical framework The Earth Charter was finalized and then launched in 2000 and its legitimacy has been further enhanced by its endorsement by over 6 500 organizations including many governments and international organizations In the light of this legitimacy an increasing number of international lawyers recognize that the Earth Charter is acquiring the status of a soft law document The book also shows the strong connection between ecological integrity and social justice particularly in the defence of indigenous people and includes contributions from both the North and the global South specifically from Central and South America

Anthropology Paul Sillitoe,2016-05-23 Advancing the rising field of engaged or participatory anthropology that is emerging at the same time as increased opposition from Indigenous peoples to research this book offers critical reflections on research approaches to date The engaged approach seeks to change the researcher researched relationship fundamentally to make methods more appropriate and beneficial to communities by involving them as participants in the entire process from choice of research topic onwards The aim is not only to change power relationships but also engage with non academic audiences The advancement of such an egalitarian and inclusive approach to research can provoke strong opposition Some argue that it threatens academic rigour and worry about the undermining of disciplinary authority Others point to the difficulties of establishing an appropriately non ethnocentric moral stance and navigating the complex problems communities face Drawing on the experiences of Indigenous scholars anthropologists and development professionals acquainted with a range of cultures this book furthers our understanding of pressing issues such as interpretation transmission and ownership of Indigenous knowledge and appropriate ways to represent and communicate it All the contributors recognise the plurality of knowledge and incorporate perspectives that derive at least in part from other ways of being in the world **Global Human Resource**

Richard Westra, 2014-10-24 Exit from Globalization moves from theory to practice from questions of where incorrigible knowledge of substantive economic life derives and how that knowledge is put towards making a progressive redistributive eco sustainable future of human flourishing Westra discards at the outset views that the root of current economic ills is the old devil we know capitalism Rather he maintains the neoliberal decades spawned a Merchant of Venice economic excrescence bent upon expropriation and rent seeking which will scrape all the flesh from the bones of humanity if not stopped dead in its tracks En route to providing a viable design for the human future in line with transformatory demands of socialists and Greens Westra exorcizes both Soviet demons and ghosts of neoliberal ideologues past which lent support to the position that there is no alternative to the market Exit from Globalization shows in a clear and compelling fashion that while debates over the possibility of another potentially socialist world swirl around this or that grand society wide scheme the fact is that creative future directed thinking has at its disposal several economic principles that transformatory actors may choose from and combine in various ways to remake human economic life The book concludes with an examination of the various social constituencies currently supporting radical change and explores the narrowing pathways to bring change about

The Right in Latin America Barry Cannon,2016-04-14 Most current analysis on Latin American politics has been directed at examining the shift to the left in the region Very little attention however has been paid to the reactions of the right to this phenomenon What kind of discursive policy and strategic responses have emerged among the right in Latin America as a result of this historic turn to the left Have there been any shifts in attitudes to inequality and poverty as a result of the successes of the left in those areas How has the right responded strategically to regain the political initiative from the left And what implications might such responses have for democracy in the region The Right in Latin America seeks to provide answers to these questions while helping to fill a gap in the literature on contemporary Latin American politics Unlike previous studies Barry Cannon's book does not simply concentrate on party political responses to the contemporary challenges for the right in the region Rather he uses a wider more comprehensive theoretical framework grounded in political sociology in recognition of the deep social roots of the right among Latin America's elites in a region known for its startling inequalities Using Michael Mann's pioneering work on power he shows how elite dominance in the key areas of the economy ideology the military and in transnational relations has had a profound influence on the political strategies of the Latin American right He shows how left governments especially the more radical ones have threatened elite power in these areas influencing right wing strategic responses as a result These responses he persuasively argues can vary from elections through street protests and media campaigns to military coups depending on the level of perceived threat felt

by elites from the left In this way Cannon uncovers the dialectical nature of the left right relationship in contemporary Latin American politics while simultaneously providing pointers as to how the left can respond to the challenge of the right s resurgence in the current context of left retrenchment Cannon s multi faceted inter disciplinary approach including original research among right leaning actors in the region makes the book an essential reference not only for those interested in the contemporary Latin American right but for anyone interested in the region s politics at a critical juncture in its history
