(Federal Emergency Management Agency) Bar Association of San Francisco,1989 Implementation of the National
Incident Management System (NIMS) and the Incident Command System (ICS) During Response and Recovery Operations
William L. Carwile,United States. Department of Homeland Security. Federal Emergency Management Agency,2011 As
FEMA continues supporting the governors of the states impacted by the unprecedented tornadoes and flooding along the
Mississippi River and its tributaries with their ongoing response recovery and mitigation efforts additional counties are still
being added within the declared states Substantial FEMA resources are now rapidly flowing into the impacted states and we
are compiling recovery estimates In 95 percent of declared disaster responses we utilize the traditional FEMA functional
organization model employing the Federal Coordinating Officer FCO appropriate Command and General Staff and program
leads to cover a few counties and a limited geographic area In smaller disaster responses such as these decisions can be
made at the Joint Field Office JFO level in a centralized manner and this can result in a workable approach However for large
scale events that include many counties parishes or other jurisdictions covering an extensive geographic area the Unified
Coordination Group UCG must actively consider adopting an expanded ICS compliant organizational structure that provides
for more distributed decision making and coordination Adhering to the ICS organizational structure when expanding to meet
operational needs not only facilitates unity of effort but helps ensure an appropriate span of control ratio Also while County
Liaisons can be a valued addition to the team for providing real time situational awareness they are not part of the ICS
structure nor are they responsible for working with county officials to prioritize and account for federal recourses For
successful outcomes it is critical that we ensure unity of effort in our operations and avoid creating stove piped or ad hoc
field operations that JFO program leads attempt to manage in a centralized manner To achieve the greatest success an ICS
compliant organizational structure requires the following 1 FCO support 2 Knowledgeable Operations Section Chiefs Branch
Directors and Division Supervisors 3 An appropriate subordinate structure with task forces and strike teams 4 A transparent
complete and trusted partnership with state counterparts 5 Close working relationships with elected and appointed officials
in each jurisdictional area 6 A disciplined approach by the program leads including Public Assistance Individual Assistance
External Affairs and especially Community Relations in which division supervisors and geographical branch directors are
kept informed of deployments of task forces or strike teams crews individuals or other personnel or resources to the
geographical areas of responsibility and 7 An effective Incident Action Plan that sets forth achievable objectives reflects clear
work assignments and provides contact information for all deployed personnel In addition to providing a workable span of
control and promoting unity of effort when implemented adhering to this organizational structure will help ensure that a
FEMA leader has knowledge of all FEMA personnel operating in a defined area A single point of contact reporting through
defined channels to the FCO ensures accountability for all FEMA personnel as well as those from other federal agencies
