Reading and Writing in the Mathematics Classroom McGraw-Hill Education, 2002-07-11 *Reading and Writing in the Mathematics Classroom* features suggestions and activities for including reading and writing as an integral part of the mathematics curriculum. It also includes suggestions for differentiated approaches to teaching mathematics for the English Language learners and inclusion students. Glencoe Mathematics, 2001 *Library Media Connection*, 2003 *English Language Learners and Math* Holly Hansen-Thomas, 2009-08-01 Taking a community of practice perspective that highlights the learner as part of a community rather than a lone individual responsible for her/his learning, this ethnographically influenced study investigates how Latina/o English Language Learners (ELLs) in middle school mathematics classes negotiated their learning of mathematics and mathematical discourse. The classes in which the Latina/o students were enrolled used a reform-oriented approach to math learning; the math in these classes was taught using a hands-on discovery approach to learning where group learning was valued and discussions in and about math were critical. This book presents the stories of how six immigrant and American-born ELLs worked with their three teachers of varied ethnicity, education experience, with second language learners and training in reform-oriented mathematics curricula to gain a degree of competence in the mathematical discourse they used in class. Identity, participation, situated learning, discourse use by learners of English as a Second Language (ESL), framing in language, and student success in mathematics are all critical notions that are highlighted within this school-based research.
