concepts embraced modernism and innovations in building technology and evolved beyond the formal rational style of early 1950s modern architecture to more of an expressionistic design. The latter resulted in abstraction of architectural forms and details and the inclusion of Jewish art in the new synagogues. *The Architecture of Modern American Synagogues 1950s 1960s* introduces an architectural analysis of selected modern American synagogues and reveals how they express American Jewry's resilience in continuing their physical and spiritual identity while embracing modernism, American values, and landscape. In addition, the book contributes to the discourse on preserving the recent past, e.g., mid 20th century architecture. While most of the investigations on that topic deal with the brick mortar challenges, this book introduces preservation issues as a function of changes in demographics, in faith rituals, in building codes, and in energy conservation. As an introduction or a reexamination, *The Architecture of Modern American Synagogues 1950s 1960s* offers a fresh perspective on an important moment in American Jewish society and culture as reflected in their houses of worship and adds to the literature on modern American sacred architecture. The book may appeal to Jewish congregations, architects, preservationists, scholars, and students in fields of studies such as architectural design, sacred architecture, American modern architecture, and building technology. Post WWII religious and Jewish studies and preservation and conservation. [University engagement and environmental sustainability](#) Patricia Inman, Diana Robinson, 2016-05-16. Universities have a key role to play in contributing to environmental development and combating climate change. The chapters within this volume detail the challenges faced by higher education institutions in considering environmental sustainability and provide both a broad view of university engagement and a detailed examination of various projects. As part of this series in association with the Place and Social Capital and Learning PASCAL International Observatory, the three key PASCAL themes of place management, lifelong learning, and the development of social capital are considered throughout the book. While universities have historically generated knowledge outside of specific local contexts, this book argues that it is particularly important for them to engage with the local community and to consider diverse perspectives and assets when looking at issues within an ecological context. The chapters in this volume provide new perspectives and frames of reference for transforming universities by engaging in the development of resilient communities.
