Global Capitalism And Transnational Class Formation Rethinking Globalizations:

Global Capitalism and Transnational Class Formation Jason Struna, 2016-03-17 The global capitalism perspective is a unique research program focused on understanding relatively recent developments in worldwide social economic and political practices related to globalization At its core it seeks to contextualize the rearticulation of nation states and broad geographic regions into highly interdependent networks of production and distribution and in so doing explain consequent changes in social relations within and between countries in the contemporary era The present volume contributes to this effort by focusing on social class formation across borders via the processes and actors that make globalized capitalism possible The essays presented here offer a wide range of emphases in terms of the particular lenses and evidence they use They cover such topics as the emergence of a transnational capitalist class based fascist regime responding to the structural crises of global capitalism as well as the links between global class formation and the US racial project as it relates to electoral politics and demographic changes in the US South This book was published as a special issue of *Globalizations*

US continues to preside over a quasi imperial system of power based on global military preponderance and financial statecraft and remains reluctant to recognize the realities global economic convergence the age of imperial state hegemony is giving way to a new international order characterized by capitalist sovereignty and competition between regional and transnational concentrations of economic power This title seeks to interrogate the structure of world order by examining leading approaches to globalization and political economy in international relations and international political economy Breaking with the classical school Woodley argues that geopolitics should be understood as a transnational strategic practice employed by powerful state actors which mirrors predatory corporate rivalry for control over global resources and markets reproducing the structural conditions for corporate power through the transnational state form of capital In a period of increasing geopolitical insecurity and economic instability this title provides an authoritative yet accessible commentary on debates on capitalism and globalization in the wake of the financial crisis It is valuable resource for students and scholars seeking to develop a deeper understanding of the historical determinants of the changing dynamics of neoliberal capitalism and their implications for world order **Critical Rationalism and Globalization** Masoud Mohammadi

Alamuti,2015-03-24 Critical Rationalism and Globalization addresses how the access to critical reason enables people to shape a new social order on a global scale This book demonstrates how the philosophy of critical rationalism contributes to the sociology of Globalization through uncovering the role of critical reason in arriving at an agreement on common values and institutions on a global scale It discusses how value consensus on the institutions of sovereignty and inter state law has prepared the ground for the rise of a global system of national societies after the end of World War II Masoud Alamuti argues that uneven openness of national economies to global trade and investment should be comprehended in the framework of the post war legal and political context Using the concept of rationality as openness to criticism the book proposes a normative theory of open global society in order to show that the existing value consensus on the cult of sovereignty suffers from the recognition of the possibility of rational dialogue among competing ways of the good life Masoud Alamuti argues that once the people of the world across national communities open their fundamental ways of the good life to mutual criticism they can create common global values necessary for the rise of a just social order on a global scale This book will be of interest to students and scholars of Globalization Studies Global Sociology and International Relations **Rethinking Imperialism** J.

Globalization: The Career of a Concept Manfred Steger, Paul James, 2017-10-02 One of the keywords of our time globalization frames how we understand our interconnected world An ambiguous signifier carrying multiple meanings the term is usually used to refer to the extension and intensification of social relations across the world Many works have been authored that deal with various aspects of globalization However it is surprising that no critical history of the concept has yet provided a historical mapping of its conceptual origins evolution and genealogical lineages This book investigates the meaning formation of globalization by featuring interviews with twelve prominent academic pioneers of the new trans disciplinary field of Global Studies who were

central in forging the career of the concept of globalization Together with an introductory chapter these interviews clarify how and why a previously obscure scholarly concept suddenly exploded in the public discourse of the 1990s In particular the interviews trace the processes by which economic discourses of free market economics became the basis for the influential association of the meaning of globalization with the dominant neoliberal framework of the 21st century This book was originally published as a special issue of *Globalizations* *Markets and Development* Toby Carroll,Darryl Jarvis,2017-10-02

Markets and Development presents a series of critical contributions focused on the political relationship between citizens civil society and neoliberal development policy s latest form The dramatic increase of access to finance investments newly gender sensitive approaches to building neoliberal labour markets the universal promotion of public private partnerships and the development financing of extractive industries have all seen citizens social movements and NGOs variously engaged in and against neoliberalism like never before The precise form that this engagement takes is conditioned by both the perceived and real opportunities and the risks of an agenda which seeks to intern emerging and frontier markets deep within a concretising world market with transformative repercussions for both those involved and notably for state society relations The contributors to this volume focus on essential aspects of the contemporary neoliberal development agenda and its relationship to and with citizens and civil society tackling questions related to the roles that various actors within civil society in the underdeveloped world are playing under late capitalism and how these roles relate to current efforts to establish and extend markets and market society more broadly in a neoliberal image This book was originally published as a special issue of *Globalizations* **Dialectics in World Politics** Shannon Brincat,2017-10-02

This volume explores the conceptual methodological and praxeological aspects of dialectical analysis in world politics As dialectics has remained an under theorised analytical tool in international relations this volume provides a critical resource for those seeking to deploy dialectics in their own research by showcasing its effectiveness for understanding and transforming world politics Contributions demonstrate a number of innovative ways in which dialectical thinking can be of benefit to the study of world politics by covering three thematic concerns i conceptual or meta theoretical dimensions of dialectics ii methodological features and general principles of dialectical approaches and iii applications and or case studies that deploy a dialectical approach to world politics Canvassing a diverse range of dialectical approaches on key issues in world politics from global security to postcolonial resistances from the theoretical problems of reification and complexity to the study of the global futures and the intercultural historical expressions of dialectics *Dialectics and World Politics* offers key insights into the social forces and contradictions that are generative of transformation in world politics and yet routinely downplayed in orthodox approaches to international relations Each chapter demonstrates how dialectics can be utilized more broadly in the discipline and deployed in a critical fashion as part of an emancipatory project This book was originally published as a special issue of *Globalizations* Occupying Subjectivity Chris Rossdale,2017-10-02

This book explores a variety of forms of radical

political subjectivity It takes its cue from the 2011 uprisings in the Middle East and North Africa the Occupy Movement and the European Anti Austerity Movement alongside the wider opposition to authoritarian and neoliberal forms of governance from which they sprang in order to ask an urgent series of questions about the subject of radical politics Who or what is it that engages in resistance Who or what should they be And how are we to negotiate the many complexities of that second question The contributions drawing on a wide range of theoretical traditions offer a rich series of provocations towards new ways of conceptualising evaluating and imagining radical political praxis They engage different kinds of subjects including protestors dancers self burners academics settlers and humans in order to think through the ways in which contemporary subjects are constituted within and work to unsettle dominant relations of power Together the chapters open up spaces to think about how political and intellectual commitment to social change can be enlivened through attention to the subject of radical politics This book was published as a special issue of Globalizations

Labour and Development in East Asia Kevin Gray, 2014-10-10 The Chinese Communist Party's response to the wave of factory strikes in the early summer of 2010 has raised important questions about the role that labour plays in the transformation of world orders In contrast to previous policies of repression towards labour unrest these recent disputes centring round wages and working conditions have been met with a more permissive response on the part of the state as the CCP ostensibly seeks to facilitate a transition away from a model of political economy based on low road labour relations and export dependence Labour and Development in East Asia shows that such inter linkages between labour geopolitical transformations and states developmental strategies have been much more central to East Asia's development than has commonly been recognised By adopting an explanatory framework of the labour geopolitics development nexus the book theorises and provides an historical analysis of the formation and transformation of the East Asian regional political
