Slow Burn R. Jisung Park, 2025-07-29 How the subtle but significant consequences of a hotter planet have already begun from lower test scores to higher crime rates and how we might tackle them today It's hard not to feel anxious about the problem of climate change especially if we think of it as an impending planetary catastrophe In *Slow Burn* R Jisung Park encourages us to view climate change through a different lens one that focuses less on the possibility of mass climate extinction in a theoretical future and more on the everyday implications of climate change here and now Drawing on a wealth of new data and cutting edge economics Park shows how climate change headlines often miss some of the most important costs When wildfires blaze what happens to people downwind of the smoke When natural disasters destroy buildings and bridges what happens to educational outcomes Park explains how climate change operates as the silent accumulation of a thousand tiny conflagrations imperceptibly elevated health risks spread across billions of people pennies off the dollar of productivity fewer opportunities for upward mobility By investigating how the physical phenomenon of climate change interacts with social and economic institutions Park illustrates how climate change already affects everyone and may act as an amplifier of inequality Wealthier households and corporations may adapt quickly but without targeted interventions less advantaged communities may not Viewing climate change as a slow and unequal burn comes with an important silver lining It puts dollars and cents behind the case for aggressive emissions cuts and helps identify concrete steps that can be taken to better manage its adverse effects We can begin to overcome our climate anxiety Park shows us when we begin to tackle these problems locally

Beyond the Bubble Test Linda Darling-Hammond, Frank Adamson, 2014-05-14 Performance assessment is a hot topic in school systems and educators continue to analyze its costs benefits and feasibility as a replacement for high stakes testing Until now researchers and policymakers have had to dig to find out what we know and what we still have to learn about performance assessment *Beyond the Bubble Test* How Performance Assessments Support 21st Century Learning synthesizes the latest findings in the field and not a moment too soon Statistics indicate that the United States is in danger of falling behind if it fails to adapt to our changing world The memory and recall strategies of traditional testing are no longer adequate to equip our students with the skills they need to excel in the global economy Instead teachers need to engage students in deeper learning assessing their ability to use higher order skills Skills like synthesizing information understanding evidence and critical problem solving are not achieved when we teach to multiple choice exams Examples in *Beyond the Bubble Test* paint a useful picture of how schools can begin to supplement traditional tests with something that works better This book provides new perspectives on current performance assessment research plus an incisive look at what's possible at the local and state levels Linda Darling Hammond with a team of leading scholars bring together lessons learned new directions and solid recommendations into a single readily accessible compendium *Beyond the Bubble Test* situates the current debate on performance assessment within

Armour, 2014 When seeking the origins of World War I the chain of events in the late nineteenth century that led to the breakdown of relations between Austria Hungary and Serbia and facilitated the rise of an aggressive Serbian nationalism needs to be understood This book focuses on the hitherto unexplored Hungarian influence on the Habsburg Monarchy's policy toward Serbia after the 1867 Ausgleich and it argues that this early period was critical in shaping policy after 1871 down to the imposition on Serbia in 1881 of a system of economic and political control The Ausgleich the Austro-Hungarian compromise that reconstituted the Empire as a dual monarchy gave Hungary a limited voice in foreign affairs and it was at the request of the Hungarian premier Count Gyula Andrássy that the young politician Benjamin Kállay was appointed representative at Belgrade in 1868 Both men were obsessed with the threat posed by Russia and particularly concerned that Serbia might be used as a stalking horse for Russian influence among the Monarchy's South Slavs They pursued a shadow policy designed to draw Serbia firmly into the Monarchy's sphere of influence which contradicted that of the foreign minister Count Beust and resulted in a serious deterioration in relations with Serbia by 1871 After 1871 Andrássy as foreign minister laid the foundations for a more explicit control of Serbia Kállay as a senior diplomat negotiated the treaties that by 1881 locked Serbia into satellite status for a generation Through detailed archival research in multiple languages and a painstaking reconstruction of diplomatic events Armour illuminates a crucial period in Central European history showing how the origins of a war that claimed millions of lives can be traced to political maneuverings almost fifty years before **A**
