

Document 2: In 1992, Pope John Paul II issued an encyclical on behalf of the Catholic Church, reaffirming its position on the scientific accuracy of evolution and its view on the historical account of history's greatest scientists.

During his visit to the Vatican, Pope John Paul II acknowledged in a speech today that the Roman Catholic Church had erred in condemning Galileo over 300 years ago. He admitted that the Church could see around the Sun.

The address by the Pope before the Pontifical Academy of Sciences closed a 35-year investigation into the Church's condemnation of Galileo in 1633, one of history's most infamous collisions between faith and science. Galileo was forced to recant his astronomical findings to avoid being burned at the stake and spent the remaining eight years of his life under house arrest.

John Paul said the theologians who condemned Galileo did not recognize the formal distinction between the Bible and its interpretation.

This led them unduly to transpose into the realm of the doctrine of the faith, questions which in fact pertained to scientific investigations.

Though the Pope acknowledged that the Church had done Galileo a wrong, he said the 17th-century theologians were working with the knowledge available to them at the time.

Question 3:

Using Document 2, what was Pope John Paul II's main message according to this 1992 newspaper article? Pope John Paul II is trying to rectify the past wrongs of the Catholic Church in respect to Galileo's trial and condemnations. He states that Galileo was correct about heliocentricity and recognizes the error of the Catholic Church over 300 years earlier. He attempts to justify the actions of the Church based on the fact that theologians of the 1600s were "working with the knowledge available to them at the time."
