Pilkey, Keith C. Pilkey, Mary Edna Fraser, 2011-06-30 An internationally recognized expert on the geology of barrier islands takes on climate change deniers in an outstanding and much needed primer on the science of global change and its effects **Global Warming** Willie Soon, Centre for Studies in Risk and Regulation, 2001 Reviews the scientific literature concerning the environmental consequences of increased levels of atmospheric carbon dioxide **Global Climate Change** Horace M. Karling, 2001 Now that the Bush Administration has kiboshed the Kyoto Protocol are efforts to curtail global warming dead Are even more technical studies called for The issue of global warming would appear to be one which will force pollution control even before the public will need to walk around with gas masks as part of their daily attire Such controls however will require a gutsy administration in Washington which may not surface in the short run This new book brings presents the issues of global climate change in a crystal clear manner leaving no doubt that a crisis is enveloping the world Global Climate Change Malcolm Prowle, 2024-11-25 Recently large parts of the world faced record high temperatures another item on a long list of warning signs about the climate This book is for the reader interested in having a better understanding of the nature and causes of climate change and the measures being undertaken Global Climate Change suggests success is unlikely and to prevent catastrophe more radical and uncomfortable actions will be needed Many groups in society e g governments economies businesses public services will need to undertake such actions to mitigate climate change and deal with its consequences This book provides guidance about what these actions will involve **Global Climate Change** James C. White, 2012-12-06 Bacteria in a test tube and humans on our planet follow the same population curve as time elapses We on this earth largely through control of disease are rapidly approaching maximum population and through energy demands are using up our resources and accumulating wastes We have come to realize the danger of a maturing system but have made essentially no impact in mitigating or preventing the problems we face While we have been able to change the world we live in most of our effects have been to degrade the planet We have nibbled away at the quality of the atmosphere for centuries and the accumulated damage has resulted in changing the world's climate at an ever increasing rate We now face the possibility of higher average temperatures over most of our planet changing patterns of rainfall rising sea levels aggravated storm systems and a myriad of social effects Climate Change: An Integrated Perspective Pim Martens, J. Rotmans, 1999-10-31 Global climate change rapid substantial and human induced may have radical consequences for life on earth The problem is a complex one however

demanding a multi disciplinary approach A simple cost benefit analysis cannot capture the essentials nor can the issue be reduced to an emissions reduction game as the Kyoto process tries to do It is much more sensible to adopt an integrative approach which reveals that global climate change needs to be considered as a spider in a web a triggering factor for a range of other related problems land use changes water supply and demand food supply energy supply human health air pollution etc But an approach like this which takes account of all items of knowledge known and uncertain does not produce clear cut final and popular answers It does provide useful insights however which will allow comprehensive and effective long term climate strategies to be put into effect Climate Change An Integrated Perspective will appeal to a broad spectrum of readers It is a useful source for the climate change professionals such as policy makers and analysts natural and social scientists It is also suitable for educationalists students and indeed anyone interested in the fascinating world of multidisciplinary research underlying our approach to this global change issue
