Bigger Than Life Mary Ann Doane,2021-10-18 In Bigger Than Life Mary Ann Doane examines how the scalar operations of cinema especially those of the close up disturb and reconfigure the spectator's sense of place space and orientation Doane traces the history of scalar transformations from early cinema to the contemporary use of digital technology In the early years of cinema audiences regarded the monumental close up particularly of the face as grotesque and often horrifying even as it sought to expose a character's interiority through its magnification of detail and expression Today large scale technologies such as IMAX and surround sound strive to dissolve the cinematic frame and invade the spectator's space immersing them in image and sound The notion of immersion Doane contends is symptomatic of a crisis of location in technologically mediated space and a reconceptualization of position scale and distance In this way cinematic scale and its modes of spatialization and despatialization have shaped the modern subject interpolating them into the incessant expansion

Kimberly Elam, 2004-08-12 Kimberly Elam argues that all great graphic design is based on a grid even if only to subvert it. Illustrated with over 100 examples, this text explores the potential of grid-based design and demonstrates how grids can underlay truly creative typography.

I Heart Design Steven Heller, 2011-03-01 *I Heart Design* is a collection of favorite designs as selected by 80 prominent graphic designers, typographers, teachers, scholars, writers, and design impresarios. Designers have preferences like modern over postmodern, serif over sans serif, decorative over minimal, but designers could not be engaged in design practice if they did not love design. The reasons for such a charged emotion vary from individual to individual, but there are certain commonalities regarding form, function, outcome, and more. Design triggers something in all of us that may be solely aesthetic or decidedly content-driven, but in the final analysis, we are drawn to it through the heart. Designs featured include the iconic CBS eye, the stark Kodak identity, the Coca-Cola bottle, and of course The Rolling Stones Sticky Fingers album cover.

Die Vermessung des Kosmos Kerstin Geßner, 2020-02-17 Auf der Suche nach den Wurzeln einer organisierten Raumordnung im europäischen Stadtewesen widmet sich dieses Buch dem kontrovers diskutierten Zusammenhang von Geometrie und Stadtplanung im Mittelalter. Vor dem Hintergrund der neuplatonisch christlichen Kosmologie wird dabei die praktische Umsetzung klassischer geometrischer Konstruktionen mittels mittelalterlicher Vermessungstechnik im Stadtentwurf ausführlich diskutiert. Exemplarisch illustriert wird dies anhand einer Analyse von zwölf Stadtgrundrissen, deren Wehr- und Sakraltopographie nicht nur die chiffrierte Verflechtung urbaner Raumorganisation mit mittelalterlicher Ikonographie, Astronomie und Geodäsie offenbart, sondern auch den symbolischen Stellenwert einer irrationalen Proportion, die bis heute unter der Bezeichnung Goldener Schnitt bekannt ist.
