Treatments for Troubled Youth R.L. Amdur, William S. Davidson, C.M. Mitchell, R. Redner, 2013-06-29 The purpose of this volume is to present the whole story of our research program on alternative interventions with delinquent youth It is our goal to describe the development of an alternative intervention model to examine its salient processes to provide a test of its relative effectiveness and to give a description of its systemic impacts The process described was based on the notion that improvement in our approaches to troubled youth lies in a systematic examination of the efficacy of innovative models As the reader is probably aware the history of interventions with troubled youth is more a record of failure than success Thus the search for alternatives is extremely critical The book proceeds as a detailed research monograph The first four chapters describe the historical and theoretical antecedents of the development of the research program Chapters 5 through 11 describe research on the efficacy of alternative intervention approaches for delinquent youth research on the impact on nonprofessional change agents an attempt to integrate contemporary theoretical propositions about delinquency causation and the effects observed and research examining the systemic consequences of providing innovative interventions to delinquent youth The final chapter integrates the findings with contemporary work and provides suggestions for future work
