The State of the System Paul W. Bennett, 2020-09-23 Over the last fifty years Canada's public schools have been absorbed into a modern education system that functions much like Max Weber's infamous iron cage. Crying out for democratic school level reform, the system is now a centralized bureaucratic fortress that every year becomes softer on standards for students less accessible to parents, further out of touch with communities and surprisingly unresponsive to classroom teachers. Exploring the nature of the Canadian education order in all its dimensions, *The State of the System* explains how public schools came to be so bureaucratic, confronts the critical issues facing kindergarten to grade 12 public schools in all ten provinces, and addresses the need for systemic reform. Going beyond a diagnosis of the stresses, strains, and ills present in the system, Paul Bennett proposes a bold plan to re-engineer schools on a more human scale as the first step in truly reforming public education. In place of school consolidation and managerialism, one size fits all uniformity, limited school choice, and the success for all curriculum, Bennett advocates for a new set of priorities: decentralize school governance, deprogram education ministries and school districts, listen to parents and teachers, and revitalize local education democracy. Tackling the thorny issues besetting contemporary school systems in Canada, *The State of the System* issues a clarion call for more responsive, engaged, and accountable public schools.

Theorizing Teaching and Learning in Asia and Europe John Chi-Kin Lee, Kerry J. Kennedy, 2017-03-27 There has been much debate in recent times between the Anglo-American tradition of curriculum studies and the Continental and North European tradition of didactics. Didaktik. As important as such debate has been, this book seeks to add new voices to the debate, representing ideas and traditions from a different part of the world. The focus is on Chinese curriculum thinking that has passed through a number of stages and currently represents a blend of some aspects of the American tradition and Chinese cultural traditions. How does Chinese thinking about curriculum, teaching, and learning resonate with European didactic traditions, and what are the implications for theorizing an expanded field of curriculum studies? This book deliberately transcends borders and cultures to explore new territory, to provide a platform for open dialogue, and to open up new areas of investigation. Chapters include: Curriculum Reform and Research in China; A Social Historical Perspective; What Mathematics Did Teachers Learn; Comparison of the School and the Pre-Service Teacher; Mathematics Curricula in Germany and Taiwan; Living in Parallel Worlds: A Transatlantic Dialogue between General Didactics and Instructional Design.

Policing Black Lives, Revised and Expanded Edition Robyn Maynard, 2025-10-15T00:00:00Z The bestselling first edition of *Policing Black Lives* became a mainstay of bookshelves and classrooms across North America and Europe as the first comprehensive account of the state-sanctioned surveillance, criminalization, and punishment of Black lives in Canada. This revised and expanded edition updates the original text in the wake of global Black uprisings in 2020 and offers new insights on how to build liveable futures without policing. Delving behind Canada's veneer of multiculturalism and tolerance, award-winning scholar and activist Robyn Maynard traces the

afterlives of slavery across multiple institutions Maynard sheds light on the state's role in perpetuating colonial dispossession racial profiling police killings incarceration immigration detention deportation exploitative migrant labour practices disproportionate child removal and the school to prison pipeline as well as the ubiquity of Black resistance The first new chapter meticulously documents how half a century of police reforms have served to undermine Black freedom struggles while expanding the scope and scale of policing in Canadian society In the second Maynard advances a compelling vision for making policing obsolete and building new forms of safety
