Grade 9 Geography Textbook:

Glencoe world geography Richard G. Boehm, 2005 **Diversities and Interculturality in Textbooks** Kaisa Hahl, Rita Johnson Longfor, Pia-Maria Niemi, 2015-04-01 Textbooks are crucial in shaping today's global and diverse world. They can contribute to making it both better and more intercultural but also on occasion create limited and biased ideas about the Other. This collected volume undertakes multidisciplinary research into textbooks taking one of the best education systems in the world, Finland, as an example. The authors investigate the issue of diversities in textbooks from multiple perspectives, disciplines, school levels, and content areas. Together, the chapters provide examples of hidden ideologies, neo-stereotyping, and othering when looking beneath the surface of texts and illustrations. The authors also present concrete tools that can be used for analysing diversities and interculturality in textbooks. In addition, the chapters will serve to develop teachers' and students' abilities to encounter diversities and similarities in ways that enhance their sensitivity, self-reflexivity, and criticality. This volume will be of interest for students in educational sciences, pre-service teachers, and in-service teachers of various school subjects, teacher educators, and researchers in the areas of subject didactics, multicultural and intercultural education, language education, educational leadership, curriculum, and policy. Forewords and Commentary by Jari Lavonen, Karen Risager, Adrian Holliday, and Julie S. Byrd Clark.

Textbooks and Educational Media: Perspectives from Subject Education Péter Bagoly-Simó, Zuzana Sikorová, 2021-08-05 This book brings together empirical research and conceptual work on textbooks and education media from 13 countries and 17 disciplines. Along with textbook production, usage, and development, it also explores the interconnectedness of educational policy and teaching and learning materials. Further, the book offers insights into regional and local discourses, e.g., specific theories of Portuguese and Spanish-speaking countries as well as Nordic countries, contrasting their theories with international literature, practices, and solutions with regard to teaching selected subjects at the pre-primary, primary, secondary, and tertiary level. This book also discusses the specific combinations of subjects, e.g., Physics, Biology, Geography, Swedish, English, and their subject-specific education, e.g., Physics Education or Didactics. Lastly, it examines the work of a number of early career researchers, giving them a voice and bringing in fresh ideas currently being developed in various countries around the globe. This proceedings volume will appeal to publishers, subject educators in primary, secondary, and tertiary education, and academic researchers from the fields of textbooks, educational media, and subject-specific education. Its international authorship and explicit focus on subject-specific particularities of educational media provide a unique and comprehensive overview.
