*Primer on Flat Rolling* John G. Lenard, 2013-12-04 *Primer on Flat Rolling* is a fully revised second edition and the outcome of over three decades of involvement with the rolling process. It is based on the author's yearly set of lectures delivered to engineers and technologists working in the rolling metal industry. The essential and basic ideas involved in designing and analysis of the rolling process are presented. The book discusses and illustrates in detail the three components of flat rolling: the mill, the rolled metal, and their interface. New processes are also covered: flexible rolling and accumulative roll bonding. The last chapter contains problems with solutions that illustrate the complexities of flat rolling. New chapters include a study of hot rolling of aluminum contributed by Prof M Wells, advanced applications of the finite element method by Dr Yuli Liu and by Dr G Krallics, roll design by Dr J B Tiley, and the history of the development of hot rolling mills written by Mr D R Adair and E B Intong. Engineers, technologists, and students can all use this book to aid their planning and analysis of flat rolling processes. Provides clear descriptions for engineers and technologists working in steel mills. Evaluates the predictive capabilities of mathematical models. Assignments and their solutions are included within the text.

**The Soft Power of the Korean Wave** Youna Kim, 2021-09-05 At this fascinating historical moment, this timely collection explores the new meaning of the Korean Wave and the process of media production, representation, distribution, and consumption in a global context as a distinctive and complex form of soft power. Focusing on the most recent phenomenon of Korean popular culture, this book considers the Korean Wave in the global digital age and addresses the social, cultural, and political implications in their complexity within the contexts of global inequalities and uneven power structures. The collection brings together internationally renowned scholars and regional specialists to examine this historically significant, visibly growing yet under-explored current phenomenon in the global digital age. Drawing on a wide range of perspectives from media and communications, cultural studies, sociology, history, and anthropology, and including a series of case studies from Asia, the USA, Europe, and the Middle East, it provides an empirically rich and theoretically stimulating tour of this area of study, going beyond the standard Euro-American view of the evolving and complex dynamics of the media today. This collection is essential reading for students and scholars interested in Korean popular culture and in film, media, fandom, and cultural industries more widely.

Landmark Cases in the Law of Contract Charles Mitchell, Paul Mitchell, 2008-05-30 *Landmark Cases in the Law of Contract* offers twelve original essays by leading contract scholars. As with the essays in the companion volume *Landmark Cases in the Law of Restitution* (Hart 2006), each essay takes as its focus a particular leading case and analyses that case in its historical or theoretical context. The cases range from the early eighteenth to the late twentieth centuries and deal with an array of contractual doctrines. Some of the essays call for their case to be stripped of its landmark status, whilst others argue that it has more to offer than we have previously appreciated. The particular historical context of these landmark cases, as revealed by the authors, often shows that our current assumptions about the case and what it stands for are either mistaken or require

radical modification The book also explores several common themes which are fundamental to the development of the law of contract for instance the influence of commercial expectations appeals to reason and the significance of particular judicial ideologies and techniques
