

EXPERT ADVICE | Studio essentials

Get all this and you'll be ready to start

01 Backdrop

Most backdrops come in the form of a roll of paper. They're available in a variety of sizes and colours. You'll need support stands and a pole to keep the backdrop in place. If you don't have one, try a large sheet or piece of fabric. Black velvet is a great choice, it has light-absorbing qualities and gives a nice rich black.

02 Main light

Use this with a diffuser, like a softbox. A softbox softens the light so the shadows are less harsh, and gives window-shaped catchlights in the eyes. The angle, height and distance of the main light are vital to getting the look you want. The power of the flash is controlled using buttons on the flash head.

03 Camera

You'll need to connect your camera to the studio lights. This can be done through a sync cable (if your SLR has a PC socket) or with wireless triggers. In a controlled environment like a studio you're best off switching to Manual mode.

04 Hair light

The second light is positioned behind the model with a snoot attached. The snoot concentrates the light, and here we've got it

pointing at the hair. Not only does this light the hair, it creates a separation from the background.

05 Reflector

A reflector is used to bounce light back from the main light into the shaded side of the subject's face. This ensures the shadow is still there to define the shape of the face but isn't too dark. See the opposite page for more on reflectors.

06 Model

If you don't have a friend or family member you want to photograph you can often find willing models via networking websites such as www.modelmayhem.com and

www.purpleport.com. New models are keen to build their portfolios and increase their experience and so you can usually come to mutually agreeable arrangements – for a small fee or trading their time in exchange for use of your photos.
