Abstract

Abstract: To explore most suitable and efficient method for the removal of dyes from textile effluents. **Methods:** **Statistical Analysis:** In this paper, statistical information of research work carried out by many researchers related to various methods for the removal of cationic dyes especially Methylene B, Methylene Blue, Crystal Violet, Methylene Green and Solochrome-B dye present in textile effluent have been compiled and compared to find out cheap and effective method by calculating their percentage removal. **Results/Recommendation:** It has been found that among all the methods reported so far, Adsorption process shows promising results and overcomes almost all the demerits of otherwise efficient methods like advanced oxidation and electro-coagulation etc. in terms of high cost and sludge problems. In the use of natural adsorbents and agricultural/industrial waste materials especially modified flyash, red mud, activated rice husk, surfactant modified alumina, bentonite clay as adsorbents is recommended for the removal of cationic dyes since they are of low cost, eco cost, easily available and have great affinity for dyes. Moreover agricultural/industrial waste often poses a disposal problem. In their use (after chemical treatment) as adsorbent is environmental friendly. **Limitations/Improvements:** This review paper would be helpful to find the most promising method for the removal of cationic dyes from the textile effluent considering the merits and demerits of each method. Much work has been done to explore the most effective and cheap method for the removal of dyes, recently but not under the range of operating conditions. In future, more methods need to be explored to study and check removal of dyes from real textile effluent at the industrial level as the dye effluent also contains other harmful pollutants. Attention is to be paid to develop cheaper and more efficient adsorbents from the agricultural/ industrial waste with some modification which would be cost effective. Moreover, management of exhausted adsorbents is also to be taken care of.

Keywords: Biodegradable, Biosorbent, Cationic Dyes, Coagulation, Adsorbent Extraction and Fenton's Reagent

How to Write and Publish a Scientific Paper Robert A Day, Barbara Gastel, 2006-04-26 Guide on writing and submitting a scientific paper for graduates to professionals

Clinician's Guide to Medical Writing Robert B. Taylor, 2006-03-20 This book is for the clinician who wants to write. It is for the physician, physician assistant, or nurse practitioner who sees patients and who wants to contribute to the medical literature. You may be an assistant professor aspiring to promotion or a clinician in private practice who seeks the personal enrichment that writing can bring. If you are new to medical writing or even if you have been the author of some articles or book chapters and seek to improve your abilities, this book can help you. Who am I that I can make this assertion and write this book both fairly presumptuously? Here's my reasoning. As a practicing physician, writing has been my avocation, unlike the authors of many other writing books. I am not a journal editor. Over 14 years in private practice and 26 years in academic medicine, I have written all the major models described in this book: review articles, case reports, editorials, letters to the editor, book reviews, book chapters, edited books, authored books, and reports of clinical research studies. Most have been published. Not all. Perhaps my most significant qualification is not that I have managed to produce a lengthy curriculum vitae. In my opinion, what is more important for you, the reader, is that I have made all the errors. That's right, the mistakes.

How to Write and Publish a Scientific Paper Barbara Gastel, Robert A. Day, 2022-06-30 Thoroughly updated throughout, this classic practical text on how to write and publish a scientific paper takes its own advice to be as clear and simple as possible. The purpose of scientific writing, according to Barbara Gastel and Robert A. Day, is to communicate new scientific findings. Science is simply too important to be communicated in anything other than words of certain meaning. This clear, beautifully written, and often funny text is a must-have for anyone who needs to communicate scientific information, whether they're writing for a professor, other scientists, or the general public. The thoughtfully revised 9th edition retains the most important material, including preparing text and graphics, publishing papers, and other types of writing, and plenty of information on writing style, while adding up-to-date advice on copyright, presenting online, identifying authors, creating visual abstracts, and writing in English as a non-native language. A set of valuable appendices provides ready reference, including words and expressions to avoid, SI prefixes, a list of helpful websites, and a glossary. Students and working scientists will want to keep *How to Write and Publish a Scientific Paper* at their desks and refer to it at every stage of writing and publication.

English for Writing Research Papers Adrian Wallwork, 2023-09-20 Publishing your research in an international journal is key to your success in academia. This guide is based on a study of over 1000 manuscripts and reviewers' reports, revealing why papers written by non-native researchers are often rejected due to problems with English usage and poor structure and content. With easy-to-follow rules and tips and examples taken from published and unpublished papers, you will learn how to prepare and structure a manuscript, increase readability, and reduce the number of mistakes you make in English by writing concisely, with no redundancy and no ambiguity. A Practical Guide to Scientific Writing in Chemistry Andrew Terhemen Tyowua, 2023-03-31 Successful completion of postgraduate studies especially PhD and career advancement in academia strongly depend on the ability to publish scientific papers or books and attract research grants However many chemical scientists find preparing scientific papers and research grant and book proposals difficult partly because of insufficient training in writing and partly because there are few practical books to enable them to learn the art This step by step practical guide is intended mainly for postgraduate students and early career researchers in chemical science and the libraries that serve them but will also be useful to other scientists Key Features Improves the reader's chances of getting their manuscript published in chemistry journals Increases the likelihood of winning research grants in chemistry Takes a lead by the hand approach Contains chapters on the preparation of graphical abstracts and research highlights Uses sketches and other illustration styles to aid mental visualization of concepts Contains practical examples taken from published papers and successful research grant proposals
