The November 2012 IAEA Report on Iran and Its Implications

The new quarterly report from the International Atomic Energy Agency (IAEA) on Iran's nuclear program, which is now in circulation, finds that Tehran has continued to install more centrifuges for uranium enrichment at its underground complex at Fordow. The November 16 IAEA report says that Iran has installed an additional 644 centrifuges at Fordow and 991 at Natanz, both of which are regularly inspected by the Agency.

However, the total number of operating centrifuges at Fordow (696) has not yet increased, according to the Agency. The IAEA report also notes that while Iran continues to experiment with advanced and more efficient types of centrifuges, it is not yet using them for production-scale operations.

The IAEA also reports that Iran has continued enriching uranium to the 20% level at the previously reported rate and that its stockpile of 20% material has increased moderately—by 43 kg. According to the IAEA's November report, Iran has produced 232 kg of 20% material, of which 96 kg was converted or slated for conversion to uranium oxide powder, ostensibly for the production of fuel plates for its Tehran Research Reactor. This leaves a stockpile of 134.9 kg of 20% enriched uranium in hexafluoride form. In August, the IAEA reported that Iran had produced 189.4 kg of 20% enriched uranium, of which 91 kg was stockpiled as hexafluoride.

HIGHLIGHTS

- Iran's stockpile of 20% enriched material, if further enriched to weapons-grade, is still short of the amount necessary for one nuclear weapon.
- Iran has completed installation of the centrifuges that its underground enrichment facility, Fordow, is designed to hold, but the number of operating centrifuges remains unchanged since the last IAEA report.
- The IAEA report confirms that Iran has not made significant progress on its advanced centrifuges, which are still not ready for full-scale use.
- Construction on the Arak heavy water reactor continues, but Iran pushed back the date that it expects to begin operations at the facility from the third quarter of 2013 to early 2014.
- The IAEA is still investigating possible military dimensions of Iran's nuclear activities and has been unable to reach an agreement with Tehran on a framework for resolving the outstanding concerns.
- There is still time for a negotiated resolution to Iran's controversial nuclear program, if the P5+1 and Iran both exercise greater flexibility and creativity and agree to address the most pressing concerns of each side.

Braun,2008-03-26 This book examines the current state of relations between NATO and Russia discussing a number of key areas including the impact of NATO s eastward expansion the NATO Russia Council and Russia s reassertion of itself in its near abroad and assesses the prospects for future development Containing Iran Sasan Fayazmanesh,2013-11-13 Since the 1979 Revolution in Iran and the end of a close relationship between the US and the Shah successive American administrations including the Obama Administration have tried to contain Iran by various means particularly sanctions and military threats Even though President Obama came to office promising to engage Iran in reality his administration has followed the policy of tough diplomacy which has included among other acts imposing draconian sanctions against Iran Following the author s earlier book on the history of containment of Iran and Iraq the current book examines closely the Obama Administration s policy toward Iran as well as the role played by Israel the European Union and the International Atomic Energy Agency IAEA in the implementation of this policy Specifically it is argued that the policy of tough diplomacy designed mostly by those associated with the Israeli lobby groups was intended to give an ultimatum to Iran in some direct meetings telling Iran to either accept the US Israeli demands or face aggression The meetings were also intended to create the illusion of engaging Iran in order to gain international support for aggressive actions Barack Obama announced this policy in his speeches as a Senator particularly at the American Israel Public Affairs Committee policy conferences After he became president in 2008 the policy of aggressive diplomacy was put in motion While pretending to engage Iran in diplomacy

the Obama Administration in coordination with the US Congress and the government of Israel pushed for the most confrontational IAEA reports on Iran and an unprecedented set of unilateral and multilateral sanctions The US and Israel also engaged in a campaign of military threats sabotage and assassination of Iranian nuclear scientists Yet after four years of hostilities the policy of tough diplomacy failed to achieve many of its goals and failed to contain Iran

The American Rhetorical Construction of the Iranian Nuclear Threat Jason Jones, 2011-06-02

From 2002 to 2008 the Bush administration argued that Iran was developing nuclear weapons despite years of inconclusive International Atomic Energy Agency inspection reports In the absence of substantive evidence much of the debate was conducted via public forums with a heavy persuasive element to the discourse This book offers an in depth consideration of the rhetoric surrounding Iran's controversial nuclear programme It takes an interdisciplinary approach examining speeches interviews news reports online message boards and newspaper layouts during the Bush Presidency 2000-2008 Engaging with visual grammar and narrative the book looks at layouts from the Associated Press The New York Times and The Washington Post amongst others The book points out using rhetorical theory and discourse analysis the conditions that lent credibility to the Bush administration's position by examining the arguments Bush and his political surrogates put forward and the discourse strategies that influenced which ideas gained salience and which were downplayed Political communication and Foucault's theory of governmentality are brought in to articulate the implications regarding the influence importance and expansion of executive power

The Gulf Military Balance Anthony H. Cordesman, Bryan Gold, 2014-03-12

The United States faces major challenges in dealing with Iran the threat of terrorism and the tide of political instability in the Arabian Peninsula The presence of some of the world's largest reserves of oil and natural gas vital shipping lanes and Shia populations throughout the region have made the peninsula the focal point of US and Iranian strategic competition Moreover large youth populations high unemployment rates and political systems with highly centralized power bases have posed other economic political and security challenges that the Gulf states must address and that the United States must take into consideration when forming strategy and policy

Evolving Iran Barbara Ann Rieffer-Flanagan, 2013-03-22

Evolving Iran presents an overview of how the politics and policy decisions in the Islamic

Republic of Iran have developed since the 1979 revolution and how they are likely to evolve in the near future Despite the fact that the revolution ushered in a theocracy its political system has largely tended to prioritize self interest and pragmatism over theology and religious values while continuing to reinvent itself in the face of internal and international threats The author also examines the prospects for democratization in Iran Since the early years of the twentieth century Iranians have attempted to make their political system more democratic yet various attempts to produce a system where citizens have a meaningful voice in political decisions have failed This book argues that greater democratization is unlikely to occur in the short term especially in light of increased threats from the international community This accessible overview of Iran s political system covers a broad array of subjects including foreign policy human rights women s struggle for equality the development and evolution of elections and the institutions of the political system including the Revolutionary Guards and Assembly of Experts It will appeal to undergraduates and the general public who seek to understand a country and regime that has mystified Westerners for decades

Containing Iran Robert J. Reardon, 2012-09-27 Iran s nuclear program is one of this century s principal foreign policy challenges Despite U S Israeli and allied efforts Iran has an extensive enrichment program and likely has the technical capacity to produce at least one nuclear bomb if it so chose This study assesses U S policy options identifies a way forward and considers how the United States might best mitigate the negative international effects of a nuclear armed Iran

Iran, Israel, and the United States Ofira Seliktar, Farhad Rezaei, 2018-06-20 This book analyzes the process of evaluating Iran s nuclear project and the efforts to roll it back resulting in the 2015 nuclear agreement known as the Joint Comprehensive Plan of Action JCPA

Despite its aura of scientific exactitude nuclear intelligence is complex and susceptible to methodological disagreements and political bias at the international oversight level the International Atomic Energy Agency IAEA and within the countries involved in the rollback project Israel and the United States To highlight both the technological problems of assessing compliance and the politicization each chapter in the book uses a real time comparison of the nuclear developments in Iran and the perception of Israel and the United States This methodology yielded some significant results Essentially two camps had formed in each country those who were pushing for an agreement with Iran and those who opposed it The Israeli intelligence agencies the Mossad and the Military Intelligence as well as the highly secretive Israeli Atomic Energy Commission IAEC which advised them considered the program to be weak and slow moving The right wing government of Benjamin Netanyahu suggested that Iran was steps away from the point of no return making it an existential threat to Israel A virtually identical split emerged in Washington While the intelligence community and the advising scientists from the National Nuclear Laboratories considered Iran progress to be relatively modest the Republicans and the Israel lobby the Jewish organizations and the Christian Zionists warned of the imminent danger of a nuclear Iran With the Obama administration pushing for the JCPOA a fierce debate took place in Congress The Israeli intelligence and military chiefs led by the Mossad chief Meir Dagan which had previously blocked Netanyahu from a preemptive action quietly supported the agreement In Washington the Israel lobby and the Republicans helped by Netanyahu mounted an all out effort to defeat the deal in Congress The pro deal coalition fought back by mobilizing the scientific community military and intelligence officials the business lobby and grassroots Democrats The JCPOA represents the first successful effort of peaceful counterproliferation At the same excessive politicization has clouded its legitimacy and cast doubt about its future

The United States and Iran Sasan Fayazmanesh, 2008-03-31 When and why did the United States policy of containment of Iran come about How did it evolve Where is it going Much has been said about the US policy of dual containment particularly as it pertains to Iraq However there has been little in depth analysis of this policy when it comes to Iran Sasan Fayazmanesh explores this often neglected subject by analyzing the history of this policy The analysis includes the role that the Carter and Reagan Administrations played in the Iran Iraq war the numerous sanctions imposed on Iran by the Clinton Administration and the aggressive and confrontational policy toward Iran adopted by the George W Bush Administration after the events of September 11 2001 This topical read synthesises a range of primary sources including firsthand reports newspaper articles and electronic media and presents a coherent analysis of the ebbs and flows in the US thinking on Iran and Iraq

Iran's Nuclear Diplomacy Bernd Kaussler, 2013-07-31 This book examines the dynamics of relations and the substance of the negotiations between the international community and Iran over the latter's nuclear programme Iran's nuclear programme and the alleged threat to international peace and security remains one of the most important issues in the United States as well as in European foreign affairs In the US Iran has dominated the political discourse for over three decades and Europe

has spent considerable political capital in finding a diplomatic solution to Iran's nuclear ambitions. While relations between both states remain subject to mutual hostility, the EU remains a channel of communication and since 2003 has maintained a multilateral negotiation framework. By and large, the narrative on nuclear negotiations is dominated by constructivist and realist literature portraying relations between the US and Iran in ideological terms as a prolonged struggle for regional influence. Embedded within conflict resolution and diplomatic theory, this work attempts to bridge this gap. Drawing upon primary documents and interviews, the text examines negotiation behaviour and strategies and tools of statecraft as well as analysing technical aspects of initiatives concerning the nuclear programme. This book will be of much interest to students of nuclear proliferation, international diplomacy, Middle Eastern politics, security studies and IR in general. India-Iran Relations Sujata Ashwarya, 2017-04-21. This book examines India's relationship with Iran since the post World War II period and its unique search for meaningful bilateral ties in the West Asian region in the context of the changing regional and international scenarios. The four chapters highlight the achievements and constraints on the development of Indo-Iranian relations during the Cold War era, opportunities and limitations in bilateral engagements between India and Iran in the aftermath of the Cold War, impact of the US factor on the development of crucial Indo-Iranian energy ties and the limitation imposed by India's relations with Israel and Saudi Arabia on the India-Iran ties. More specifically, the four chapters touch on the central drivers: energy imports, access to Central Asia, cooperation in Afghanistan, mutual trade and economic investments and security ties of India's Iran policy and how they structure India's interaction with the other countries of the region and impact on the articulation of national interests. Combining a rich interplay of facts and figures with nuanced analyses, this volume will be a valuable resource for scholars, policymakers, diplomats and any interested reader desirous of knowing more about Indo-Iranian relations in particular and India's West Asia policy in general.
