

## Introduction

### Common Mistake

One common mistake is that, if asked, say "Examine the reasons for Allied Victory in the First World War", 90% of students would go on to just identify some factors for Allied Victory:

"The Allied Powers emerged victorious in the First World War as a consequence of the intermeshing dynamics of US intervention, Allied economic superiority and the Central Powers' strategic errors." And proceed to explain all three in a sentence.

This looks like a good introduction, but it is not. One thing done right is the identification of various factors. However, this is an essay, a debate – it is not about listing three reasons for Allied victory, it is about weighing the importance of these three reasons against each other and determining which one is the most important. For example, a good introduction would look more like this:

"Whilst historians such as Niall Ferguson have emphasised the importance of US intervention in tipping the stalemate to gain the victory in the First World War, this argument is flawed as it fails to consider the fact that the British Naval Blockade had already begun to cripple the Central Powers' economies by 1916 and the war was already destined to end in the Allied Powers' favour. Certainly, the US intervention sped up the rate of Allied Victory. However, in the final analysis, the economic superiority of the Allied Powers, coupled with the earlier strategic errors of the Central Powers, had already fundamentally dictated Allied victory from the outset. Thus, the importance of US intervention to the outcome of the First World War pales in comparison to the Allied Powers' foundational economic prowess."

The first introduction is a band 5–6 response in that it already transcends the traditional "narrative" mistake to focus on the question and identify factors relevant to the reason for Allied Victory – so it is already somewhat making an argument. However, only an introduction like the latter is sufficient to achieve a band 7, not only transcending the traditional "narrative" mistake, but also transcending the more advanced mistake of simply identifying and explaining factors.

Note that an argument has already been made in the introduction, US intervention was not very important. In this manner, a thesis has been established and a strong argumentative essay is expected to follow rather than an explanation – this pushes you towards a maximum band 12–15.
